EZ-BT™ MODULE PROGRAMMING KIT

CYBT-343026-PROG

To use the CYBT-343026-PROG:

- 1) Put the BLE module in the socket (ensure that the BLE module is in the correct position of the socket, as shown below)

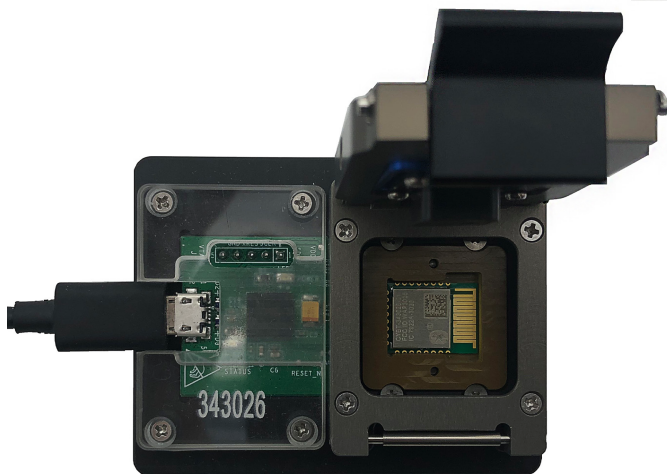

Figure 2: Module in the socket

- 2) Connect the programming device with a USB cable to a computer that has been installed with WICED Module Programmer (www.cypress.com/WICEDModuleProgrammer)
- 3) Run the programming software to program the targeted BLE module with your selected firmware.
