## noise:bit

Make your [micro:bit](#) sing with noise:bit! It's a tiny speaker that packs a fair bit of punch, and it's perfect for BLEEPs and BLOOPS!

Just slot in your micro:bit, and use the sound generation blocks and code in Microsoft MakeCode and MicroPython to generate tones, sounds, and speech. We've had great fun combining it with [enviro:bit](#)'s light sensor to make a radio-controlled theremin!

## Features

- Comes fully-assembled and ready to use
- TPA301 amplifier chip
- 8Ω 2W Mylar speaker
- Compatible with [micro:bit](#)
- No soldering required!

## Software

You can code noise:bit with the block-based [Microsoft MakeCode editor](#), using its audio generation blocks, if you want to delve deeper, then you can use MicroPython in the [Mu code editor](#).
