HTB - Connectors / Board to Board

Product profile

Application Connectors

Connector Board to Board

Pitch 0.635 mm

Smt no

Spécifications

Current rating 0.5A AC, DC

Insulation resistance 50 mOhms min.

Temperature range -55°C to 85°C

Voltage rating 50V AC, DC

Number of circuits 30 & 40

Compliant with rohs

[Download specifications](#)

This HTB connector is 0.635mm pitch SMT type board-to-board connector with parallel and perpendicular connection.

Presentation from the company

[Cookie management](#)

JST France, electronic components manufacturer, was established in Vitry-le-François in 1989. Our plant is composed of 3 machine shops (molding, assembly and stamping) and an industrialization department. This allows us to be closer from our French customers and main European decision-makers.

We produce over-molding housings, connectors and harnesses, mainly for automotive sector. We are certified ISO/TS16949 in order to meet partners' quality requirements and to satisfy their needs. Among our electric components, we can put forward a wide variety of innovative catalog products and crimping tools: FFC/FPC connectors (insertion strength zero, no ZIF), to crimp/crossing, SMT/CMS (surface mounting), insulation displacement (IDC), board to board, board to wire, wire to wire, LED, waterproof, pitch from 0.1 to 13mm, hand tools, semi-automatic presses and applicators for all our crimp contacts. We can also provide you with a wide range of crimp terminals (Faston, insulated, tubular, rolled/brazed, etc.), cable ends and the corresponding electric tools.
