

# W 61

Code No.: T0056103699N

## Benefits

- > 60 W, 230 V
- > Magnastat controlled

In addition we recommend:

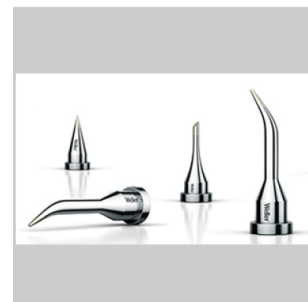

Fume extraction devices

Preheating plates

Cleaning Consumables

Soldering Tips

## Technical Data

|                                           |              |
|-------------------------------------------|--------------|
| Active Tip Heating element technology     | ---          |
| Power Response Heating element technology | ---          |
| Silver Line Heating element technology    | ---          |
| Voltage                                   | 230 V AC     |
| Heating output                            | 60 W         |
| Tip family                                | CT5 (LT, PT) |
| Power unit                                | ---          |
| WX compatible                             | ---          |
| Temperature range °C                      | 370°C        |
| Temperature range °F                      | 698°F        |
| Heat-up time                              | tbd          |
| Safety rest                               | ---          |
| Safety rest (optional)                    | ---          |
| Barrel                                    | ---          |
| Integrated tip extraction                 | ---          |
