Fiber Optic Products

MIL-PRF-29504/5
Fiber Optic Socket Terminus Size 16
For use in Multi-Channel Fiber Optic Cylindrical Connectors (Mil-DTL-38999 Series III)

Amphenol® multi-channel fiber optic connectors feature a precision optic interconnect system within the high performance MIL-DTL-38999 Series III connector. The fiber optic terminations offer low loss characteristics, with high reliability and repeatability. Amphenol size 16 termini have been designed to operate in the size 16 contact cavities of MIL-DTL-38999 Series III connectors and are available from 2 thru 37 channels.

Features and Performance Benefits:
- Precision ceramic ferrules which precisely positions the fiber within the termini
- Precision ceramic alignment sleeves which insure accurate fiber to fiber alignment
- Threaded protective shroud with anti-rotation key, manufactured from rugged PEEK material, provides protection for the ceramic alignment sleeve
- Stainless steel termini bodies and springs
- Laser welded components for stronger construction
- Designed for use in size 16 cavities of the D38999 Series III connector

CF-198143-XXX

Notes:

1. Indicated dimension when shroud and alignment sleeve are fully assembled.

2. Sizing tube shipped unassembled.
   1. Alignment sleeve and shroud shipped unassembled.

3. Indicated dimension when shroud, alignment sleeve and sizing tube are fully assembled. Insert thin wire on sizing tube in alignment effort with ATP in channel. Then push alignment sleeve on until bottoms on terminals.
