Description

RCP-1U rack system is a power distribution solution utilizing the rack configuration with 1U low profile. Starting with a single unit of 1000W, RCP-1000 is the front end rectifier (or, power supply). With the active current sharing function, up to 3000W is able to be provided by 1 stack of the 19" rack mountable shelf RCP-1U and 8000W by 3 stacks. The design flexibility for system applications is ideally fulfilled by various built-in features, such as output programming, remote ON-OFF, auxiliary power, etc.

■ Function Manual

1. Remote ON/OFF Control

The PSU can be turned ON/OFF together or separately by using the "Remote ON-OFF" function.

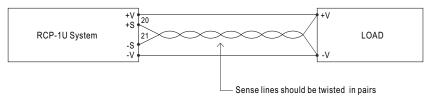

| Between Remote ON-OFF and -S | Output |
|------------------------------|--------|
| Switch Open | OFF |
| Switch Short | ON |

2. Voltage Drop Compensation

2.1 Remote Sense

The remote sense compensates voltage drop on the load wiring up to 0.5V.

2.2 Local Sense

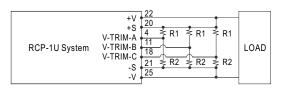

Notice: The +S,-S, on CN500 have to be connected to the +V,-V terminals locally in order to get the correct output voltage if the remote sensing is not used.

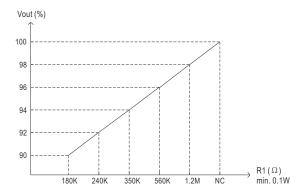

3. Output Voltage Programming (or, PV / remote voltage programming / remote adjust / margin programming / dynamic voltage trim)

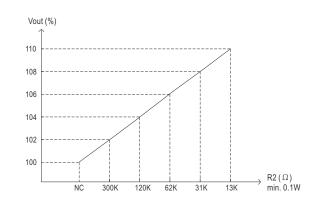

(1)Output voltage can be trimmed between 90~110% of its rated value by the following method.

(2)+S & +V, -S & -V also need to be connected on CN500.
