MGE Galaxy 4000 Features & Benefits

Availability

Dual mains input	Increases availability by allowing the UPS to be connected to two separate power sources.
Generator compatible	Ensures clean, uninterrupted power to protected equipment when generator power is used.
Automatic internal bypass	Supplies utility power to the connected loads in the event of a UPS power overload or fault.
Frequency and voltage regulation	Gives higher application availability by correcting poor frequency and voltage conditions without using the battery.
Power conditioning	Protects connected loads from surges, spikes, lightning, and other power disturbances.

Manageability

LCD graphics display	Text and mimic diagrams that display modes of operation, system parameters and alarms.
Multiple distribution options	Superior design flexibility enables a wide range of customer requirements to be addressed.
Two 42 Postion Power Panels	Provides breaker positions for distribution to racks and power zones
Network manageable	Provides remote power management of the UPS over the network.

Serviceability

Front-access servicing	Simplifies installation and UPS maintenance while minimizing space requirements.
Multiple levels of service	With the option of packages or individual service components, our services are structured to allow you to pick and choose what you would like APC to do for you.
7x24 telephone technical support	Our experienced technical support engineers are available to answer your questions, giving you peace of mind knowing the help you need is there when you need it.
