MultiTech Modems

The MultiTech SocketModem family of pin-to-pin compatible modules (formerly Conexant SocketModem) allow OEMs to integrate a wide range of modem functions and speeds into any product platform.

Utilizing a variety of SocketModem embedded modem modules, systems designers can now easily integrate multiple data, fax, and voice modem features, within a single design

- Complete data/fax modem solution, including the controller, data pump, and DAA
- V.90/56K, V.34/33.6K, V.32bis/14.4K or V.22bis/2400 bps modem modules
- TTL serial or 16550 parallel interface
- Class 1 and Class 2 faxing at 14.4K
