

## Step-Up (115VAC to 230VAC) 176 Series

### Plug-In

### Features

- Single winding, does not provide isolation, for use where equipment is already isolated and only voltage change is required.
- World wide applications, 50 or 60 Hz. operation, step up (115VAC to 230VAC).
- Input is circuit breaker protected.
- Hi-pot tested to 2 KV RMS
- Input is connected to a 5 foot cord & standard grounded North American plug (NEMA 5-15P)
- Output - Due to U.L changes in 2007 - NEW production with the European (Shuko) parts would no longer be U.L. listed. Therefore, we replaced this output receptacle with a one foot long "pig tail" cord with a standard North American 3-wire, 250V receptacle (NEMA 6-15R) for any production after the first part of 2008.
  - Receptacles have North American pins. See our **298G adaptor series** for international pinout adaptor plugs.
- North American Mark of Safety - C UL & UL listed (File #E211544).
- Indoor use only.
- Remember - These units do NOT convert line frequency
