

NEW

MCU CARD FOR KINETIS MK24FN256VDC12

MCU Card is a standardized add-on board, which allows very simple installation and replacement of the microcontroller unit (MCU) on a development board equipped with the MCU Card socket. By introducing the new MCU Card standard, we have ensured the absolute compatibility between the development board and any of the supported MCUs, regardless of their pin number and compatibility. MCU Cards are equipped with two 168-pin mezzanine connectors, allowing them to support even MCUs with extremely high pin count. Their clever design allows very simple usage, following the well-established plug & play concept of the Click board™ line of product.

MCU speed	MCU Memory	Vendor	Pin count	RAM (Bytes)	Microcontroller
120	256	NXP	121	262144	MK24FN256VDC12

PID: MIKROE-3486 Weight: 18 g
