

The products listed in this catalog are only a few of the thousands of variations that TUSONIX produces. For custom applications, please contact the factory direct.

TUSONIX Capabilities

TUSONIX, Inc. manufactures thousands of EMC Products and features an extensive line of EMI/RFI Filters and Capacitors. We combine Technology, Expertise, Versatility and Innovation to produce the industry's most complete line of ceramic EMI/RFI Filters. TUSONIX draws upon its 50 plus years of manufacturing expertise and an accumulated base of ceramic dielectric technology to provide an ever expanding line of EMI/RFI Filters and Capacitors. These products not only set the industry standard, but lead the way in the development of tomorrow's EMI Technology.

Manufacturing

Utilizing more than 120,000 square feet (11,150 square meters) of manufacturing, TUSONIX is dedicated to providing high quality EMI/RFI products.

In addition to the standard catalog items, TUSONIX has numerous variations of these designs and can custom design a part to meet particular specifications. TUSONIX maintains a staff of highly skilled Design Engineers to assist its customers in the design of custom products.

Meeting Customer Requirements

Headquartered in Tucson, Arizona, TUSONIX is devoted to bringing the company's broad product line to an ever expanding world market. TUSONIX has more than five decades of manufacturing experience and uses sophisticated equipment to provide customers full value for the products they purchase at competitive prices.

TUSONIX Quality

The Tusonix Quality Management System assures complete customer satisfaction. A fully equipped and approved Quality and Reliability Assurance Laboratory continually monitors product design and manufacturing integrity through its periodic Conformance Test Program. Tusonix also requires MIL testing for those products approved to MIL-PRF-81, MIL-C-11015 and MIL-PRF-15733.

Miniature EMI Filters

4300 Series Miniature EMI Filter

www.tusonix.com Download Catalog 4000 (.pdf format)

Please Note: TUSONIX can also supply the 4302 Series, which is epoxy sealed at both ends. Please consult our Customer Engineering Department at (520) 744-0400.

Reference Engineers Sample Kit # SK4000-903

TUSONIX 4300 Series Miniature EMI Filters are ideal for applications where small size and high performance are critical. These C configured filters can be glass sealed on either one of the ends for optimal sealing between system compartments or components. The gold plating on the leads offers excellent conductivity and connective ability using common gold bonding methods. The small package and large range of electrical characteristics of the 4300 Series make it an effective solution for a variety of micro-wave applications.

Reference Sample Kit # SK4000-903

TUSONIX 4400 Series Miniature EMI Filters are ideal for applications where small size and high performance are critical and a threaded mounting technique is desired. These C and L configured filters are available in two physical configurations and can be supplied with either unified or metric thread (see page 5 for metric.) The small package and large range of electrical characteristics of the 4400 Series make it an effective solution for a variety of micro-wave applications.

Ceramic WEECON® Capacitors

TUSONIX WEECON® Ceramic Plate Capacitors are the ideal product when it comes to demanding applications that need exact temperature compensation or very small and accurate capacitance values.

TUSONIX offers WEECON® Capacitors with temperature compensating dielectrics from NPO through N5600 and capacitance values from 1 pF to 12,000 pF for the temperature compensating dielectrics and up to .082 µF for Z5U ceramic dielectrics. Capacitance tolerance from 0.1 pF at a nominal capacitance of less than 10 pF or from 1 percent for nominal capacitance values of greater than 10 pF are available. Please refer to the Ceramic Capacitor Catalog 800 for further details.

WEECON®s are encapsulated with a hard, bright polymeric coating, which is formulated to provide mechanical protection under normal environmental conditions.

*When ordering a Miniature Quick Connect or another plate with a single row of filters, use the designation for the bottom row in the part number and enter a value of 00 in the top row of the part number.

To select different filter values please provide TUSONIX with a table showing where each filter will mount. **Example:

A	A	S	S	S
A	A	S	S	S

Ordering Information: In order for TUSONIX to establish the exact configuration required, please provide the following encoded description number as outlined below. A TUSONIX part number will then be assigned to meet your specific needs.

The part number shown below represents the Quick Connect 1.812 length with two rows of seven lines per row. The filters are pi circuits with a capacitance of 1000pF and straight leads. 7712-0707-SA

77	1	2	07	07	S	A
