PCB terminal block, 2616 Series, 0 °conductor entry to board

This PCB terminal block (item number 2616-1101) is designed for quick and simple connections. You can count on tried and tested safety with these PCB terminal blocks, perfect for a wide variety of applications when designing your devices. This PCB terminal block has a rated voltage of 1000 V and can handle currents up to 76 A, making it ideal for high-load applications. Strip lengths must be between 18 mm and 20 mm when connecting conductors to this PCB terminal block. Featuring one conductor terminal along with Push-in CAGE CLAMP®, this product outperforms the competition. Push-in CAGE CLAMP® technology provides a universal connection solution for all conductor types. It allows both solid and fine-stranded conductors with ferrules to be inserted directly into the clamping point without the need for tools. Dimensions: 12.8 x 37.2 x 32 mm (width x height x depth). Depending on the conductor type, this PCB terminal block is ideal for conductor cross sections ranging from 0.75 mm² to 16 mm². Up to one potential / one pole can be connected to this terminal block using one clamping point on one level. The gray housing is made of polyamide (PA66) for insulation, the contacts are made of electrolytic copper (ECu), and the clamping spring is made of chrome-nickel spring steel (CrNi). The contact surface is coated with tin. A lever is used to operate this PCB terminal block. THT is used to solder the PCB terminal block. Insert the conductor at a 0° angle.. The solder pins measure 1.2 x 1.2 mm in cross-section and 4 mm in length and are arranged over the entire terminal strip (in-line). There are six solder pins per potential.

Notes

Note	The inherent stability of a single-pole PCB terminal block is less than that of a multi-pole terminal strip. The customer must therefore ensure that these terminal blocks are protected against excessive mechanical stress (e.g., torsional or bending stress), both when connecting the conductor and during subsequent use, for example by providing additional support, shortly holding the connected conductor and appropriate actuation instructions.
