Arduino Uno Enclosure - Clear Plastic

PRT-12838

★★★★½ 3

SHARE

DESCRIPTION   FEATURES

The Arduino Uno is the undisputed champion of all development boards, why would you not want to keep your board safe and sound inside this clear plastic enclosure? These cases protect your Arduino Uno from things like rogue wires that might short it out while still allowing full access to the board! Simply snap the Uno into the bottom half of the enclosure, then snap the two sides together.

As you may have noticed, these enclosures are actually transparent. The enclosures are perfect for letting you see your Arduino Uno and make any needed adjustments easily.

The enclosure provides slots to access each header, USB port, power jack, the reset button, the AREF and ICSP connectors, as well as feet and vents to ensure the board gets proper cooling and slide-in wall mounting slots. All of the status LEDs on the Uno are visible through the case thanks to light pipes embedded in the design. This is a really durable case that will do a great job protecting your Arduino Uno!

Note: These enclosures are not compatible with the SparkFun Redboard.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
