

KeeLoq 3 Development Kit

No Longer Available

Part Number: DM303008

Share

NOT RECOMMENDED FOR NEW DESIGNS

Please see [DM182017-1](#) (433MHz), [DM182017-2](#) (868MHz), or [DM182017-3](#) (915MHz) or [DM182017-4](#) (433MHz) for new designs.

Please also see the [Keeloq Embedded Security page](#) for the latest information.

The low-cost KEELOQ 3 Development Kit is designed to help engineers get up-to-speed quickly on PIC microcontrollers (MCUs). The kit provides everything you need to program, debug, and develop secure authentication applications for a variety of markets such as security systems (keypads, remote sensors, and access control), remote keyless entry (automotive), and authentication (identity and property) applications.

Features

The low-cost KEELOQ 3 Development Kit is designed to help engineers get up-to-speed quickly on PIC microcontrollers (MCUs). The kit provides everything you need to program, debug, and develop secure authentication applications for a variety of markets such as security systems (keypads, remote sensors, and access control), remote keyless entry (automotive), and authentication (identity and property) applications.
