The image contains two technical drawings of a bridge deck.

Left Drawing (Cross-section): Shows a cross-section of the bridge deck. The total width is 15.40 ± 0.50 . The width of the central box girder is 11.70 ± 0.10 . The height of the deck slab is $3.00 - 0.10$. The total height of the structure is $13.45 - 0.15$. There are four vertical reinforcement bars in the central box girder. A note points to the top reinforcement bars, labeled "NOTE 6". Another note points to the bottom reinforcement bars, labeled "NOTE 3". The bottom reinforcement bars are spaced at $2.00 \pm 0.05(24X)$.

Right Drawing (Plan View): Shows the plan view of the bridge deck. The total length is 50.00 MAX. The width of the deck slab is 8.00 . The width of the central box girider is $2.00 \pm 0.05(4X)$. There are four vertical reinforcement bars in the central box girider. A note points to the top reinforcement bars, labeled "NOTE 5". The bottom reinforcement bars are spaced at 48.00 .

Technical drawing showing two connector types, 4 and 9, with dimensions relative to a seating plane.

Connector 4:

- Distance from the left end to the seating plane: 8.20
- Distance from the seating plane to the right end: 3.70

Connector 9:

- Distance from the left end to the seating plane: 8.20
- Distance from the seating plane to the right end: 16.00

The seating plane is indicated by a vertical line and labeled "SEATING PLANE FOR CONNECTOR".

A diagram showing a rectangular grid of points. The grid is 48.00 units wide and 8.00 units high. The points are arranged in a regular pattern, with 16 columns and 8 rows. The dimensions are indicated by arrows and labels: 48.00 for the width and 8.00 for the height.
