PCB terminal block, 2606 Series, 0 °conductor entry to board

Connecting conductors is quick and easy with this PCB terminal block (item number 2606-1111/020-000). You can count on tried and tested safety with these PCB terminal blocks, perfect for a wide variety of applications when designing your devices. Rated current and voltage are important parameters when choosing a PCB terminal block, as they indicate how the product can be used. This product has a rated voltage of 1000 V and a rated current of 41 A, making it suitable for high-load applications. Ensure that the strip lengths are between 11 mm and 13 mm when connecting conductors to this PCB terminal block. This product incorporates one conductor terminal and utilizes Push-in CAGE CLAMP®. Our Push-in CAGE CLAMP® is a universal, maintenance-free connection solution for all conductor types, offering a key advantage: both solid and fine-stranded conductors with ferrules can be directly inserted without the need for tools or any preparation, such as crimping the ferrule. Dimensions: 85.35 x 28 x 24.3 mm (width x height x depth). Depending on the conductor type, this PCB terminal block is suitable for conductor cross sections ranging from 0.2 mm² to 10 mm². It has one level. You can connect eleven potentials / eleven poles using the eleven clamping points. The gray housing is made of polyamide (PA66) for insulation, the clamping spring is made of chrome-nickel spring steel (CrNi), and the contacts are made of electrolytic copper (ECu). Tin is used for coating the contact surfaces. This PCB terminal block is operated with a lever. The PCB terminal block is designed for THT soldering. The conductor is designed to be inserted at a 0° angle.. The solder pins, which are 1.5 x 1.2 mm in cross-section and 4 mm long, are laid out over the entire terminal strip (staggered). There are one solder pin per potential.

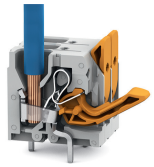
Installation Notes

Conductor termination



Insert fine-stranded conductors – and remove all conductors – via operating tool.

Conductor termination

Insert solid conductors via push-in termination.
