

Core Skill: Soldering

This skill defines how difficult the soldering is on a particular product. It might be a couple simple solder joints, or require special reflow tools

Skill Level: Noob - Some basic soldering is required, but it is limited to a just a few pins, basic through-hole soldering, and couple (if any) polarized components. A basic soldering iron is all you should need.

★★☆☆☆Not so good

about 2 years ago by TechHiker ✓ verified purchaser

I got a bad batch of these. Sometime when you plug one into another, some of the pins don't connect. And you can feel it. Sometimes you get good resistance (to movement) when you plug them together and sometimes there is almost no resistance to movement. It's almost like the male part of the pin is missing the female part of the pin. Moving along the side of the female fork instead of being pinched by the female fork... I just cut one open and that is what is happening. The pins are too thin.

 $\bigstar \bigstar \bigstar \bigstar$ Stackable headers work fine except when you are lining up 3 - 6 pin...

When you are trying to align 3 - 6 pin headers across a PCB board to fit onto the Arduino Due, the headers require sanding to get them to insert fully and align correctly. Other than that, they fit well and work well.

★★★☆ Arduino Headers

Good quality but I wish that you offered a complete set of stackable header set for the Mega. Also I would like to see a set with longer pins to clear the USB connector better.
