## Low-Voltage CMOS Quad 2-Input NAND Gate

### With 5 V-Tolerant Inputs

The MC74LCX00 is a high performance, quad 2-input NAND gate operating from a 2.3 to 3.6 V supply. High impedance TTL compatible inputs significantly reduce current loading to input drivers while TTL compatible outputs offer improved switching noise performance. A V<sub>I</sub> specification of 5.5 V allows MC74LCX00 inputs to be safely driven from 5 V devices.

Current drive capability is 24 mA at the outputs.

Maximum ratings are those values beyond which device damage can occur. Maximum ratings applied to the device are individual stress limit values (not normal operating conditions) and are not valid simultaneously. If these limits are exceeded, device functional operation is not implied, damage may occur and reliability may be affected.

1.  $I_O$  absolute maximum rating must be observed.
