Female connector, 2022 Series, operating tool

This female connector (item number 2022-111/000-038) is designed for fault-free electrical installations. Pluggable rail-mount terminal blocks are primarily found in switchgear units and control systems, most notably in railroad technology. These innovative systems combine the properties of rail-mount terminal blocks and connectors for a flexible and reliable wiring system. You also have the option of pre-assembling installations, which not only makes production but also installation, operation, and maintenance more efficient and cost-effective. Rated current and voltage are important parameters when choosing a pluggable rail-mount terminal block, as they indicate how the product can be used. This product has a rated voltage of 690 V and a rated current of 24 A. Conductors can only be connected to this female connector if their strip length is between 10 mm and 12 mm. Featuring conductor terminals along with Push-in CAGE CLAMP®, this product outperforms the competition. Push-in CAGE CLAMP® technology provides a universal connection solution for any type of conductor. It allows both solid and fine-stranded conductors with ferrules to be inserted directly into the clamping point without the need for tools. The dimensions are 57.2 x 40.5 x 22.4 mm (width x height x depth). Depending on the conductor type, this female connector is ideal for conductor cross sections ranging from 0.25 mm² to 4 mm². Up to eleven potentials / eleven poles can be connected to this terminal strip using eleven clamping points. The gray/blue/green-yellow housing is made of polyamide (PA66) for insulation. This female connector/socket is operated with an operating tool. You can connect copper conductors via front-entry wiring.

Notes

Safety Information	According to EN 61984, pluggable connectors without current interrupting capacity must not be mated or unmated when live or under load.
