

## 4GB SD card for Raspberry Pi preinstalled with Raspbian Wheezy - 2015-01-31

PRODUCT ID: 1121

DISCONTINUED

[DESCRIPTION](#)[TECHNICAL DETAILS](#)

## DESCRIPTION

This is a 4GB microSDHC card (SDC44GB) that comes with a SD adapter and is pre-programmed to contain the latest Raspberry Pi Linux distribution "Raspbian Wheezy" which was released on 2015-01-31 with the 3.18 kernel. This card is compatible with the new Raspberry Pi 2 Model B, Model A+, Model B+ (as well as the older Pi 1 Models A and B)

Please note as of Mid November 2016, something changed with the Pi 2 firmware and it will not work with this particular revision. [Please pick up a copy of NooBs instead!](#)

[Raspbian](#) is a free operating system based on Debian optimized for the Raspberry Pi hardware.

Downloaded from [Arrow.com](#), a company that provides software and utilities that make your Raspberry Pi run.

However, Raspbian provides more than a pure OS: it comes with over 35,000 packages, pre-compiled software bundled in a nice format for easy installation on your Raspberry Pi. You can [read more about Raspbian here](#). These microSDHC cards use the new speed "class" rating of Class 4 that guarantee a minimum Data transfer rate of 4MB/sec. We may ship a Sandisk or Kingston card, both are high quality and come with the same speed class rating.

Adafruit tests and verifies each card before shipment. This image can be downloaded directly from the [Raspberry Pi Website Downloads Page](#).
