2mm Pitch, Multi Functional Connector System (Floating [Board-to-Board], Swing-Lock [Wire-to-Board], Short-Circuit Pin)

DF59 Series

■Features

●Common to all series

1. High Operating Temperature

DF59's are rated at temperatures up to 105 °C.

2. Swing Lock Structure (Wire-to-Board)

The DF59 features a "swing-lock" mechanism that employs both a positive and friction lock. This helps to prevent accidental unmating by severe wiring and mechanical stress.

3. Short-Circuit Pin

The Short-Circuit Pin allows the termination of an open circuit. Typically used at the end of a series of connected circuit boards.

4. Multi Function Design

The DF59 has the ability to function as either a Board-to-Wire or Board-to-Board System. The PCB mounted receptacle is designed to mate with the W-to-B, B-to-B, and Short Circuit Pin connectors. This multi function ability allows versatility while keeping connectors to a minimum.

5. Contact Design

The terminal design features two-point contact to ensure a highly reliable connection.

6. Common Applicator

Crimping can be performed using the applicator (AP105-DF11-22S) for the existing series DF11-22S C F(A), by replacing the die with the one for DF59 series.

* For crimping quality standards and crimping conditions, crimping needs to be performed in accordance with the specific conditions of DF59-22PCFA.

●Common to DF59/59S/59SN

7. Floating Structure (Board-to-Board)

The Board-to-Board connector can be used to connect two PCB together in a co-planar arrangement and features a "Stress free contact" that floats ± 0.5mm in the X, Y and Z dimensions.

8. Space Savings

The DF59 series offers high performance in a compact, space saving design; featuring a 2mm pitch and coupled with a mated height of only 2.48mm with AWG#22 cable. The single position floating plugs DF59S and DF59SN are specifically designed to save space, and can be mounted in high density applications.

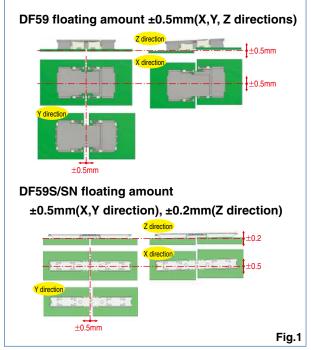

9. Robust locking structure on DF59M (W-to-B Connection)

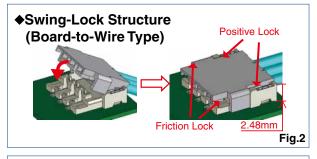

The lock mechanism on compact DF59M provides 16N horizontal lock strength. (Fig.4)

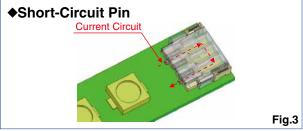

10. Standardization of PCB layout

The DF59S/SN type is used on board-to-board connections and the DF59M type is intended for wire-to-board connections. Although they have different receptacles, the PCB mounting pattern can be used for these two types. Different combinations of these connectors can be used in the same system with a common PCB. This allows for standardization of PCB. (Fig.5)

Note: Each stencil mask is necessary

◆W-to-B structure (DF59M)

Clear tactile click and high locking strength achieved by the robust locking mechanism

Mating force: 16N min. (in a horizontal direction)

Standardization of PCB pattern

DF59S/SN type and DF59M type can be used in the same system by using a common PCB.

Fig.5

■Product Specifications

		DF59/S/SN	3A	O
Ratings	Current rating	DF59M	6A (22 AWG), 5A (24 AWG)	Operating Temperature : -40 to 105°C (Note 1) Operating Humidity Range : 20 to 80%
	Voltage reting	DF59/S/SN	AC/DC 230V (Note 3)	Storage Temperature Range : -10 to 60℃ (Note 2)
	Voltage rating DF59M	AC/DC 300V (Note 3)	Storage Humidity Range : 40 to 70% (Note 2)	

Items		Specifications		Conditions		
1.Contact resistance	DF59-*P-2FC/SP DF59S/SN	50mΩ min.		Under 6V DC, must be measured by 100mA		
1.Contact resistance	DF59M-1S-H	45m $Ω$ min.		(DC or 1000Hz)		
	DF59-*P-2C	30mΩ min.				
2.Vibration	No electrical disco	ontinuity over 1μ s.		Frequency 10 to 55Hz, single amplitude 0.75mm, 3 directions, 10 cycles each		
3.Shock	No electrical disco	ontinuity over 1μ s.		Acceleration 490 m/s², 11ms; duration, sine half-wave 3 cycles in each of the 3 axis.		
		■Contact resistance	■Insulation resistance			
4.Humidity	DF59-*P-2FC/SP DF59S/SN	50mΩ min.	4000000	Temperature $40 \pm 2^{\circ}$ C, humidity 90 to 95%, left for 96 hours		
	DF59M	45mΩ min. 1000MΩ max.		left for 96 flours		
	DF59-*P-2C	30mΩ min.				
		■Contact resistance	■Insulation resistance			
5.Temperature cycle	DF59-*P-2FC/SP DF59S/SN	50mΩ min.		(-55°C: 30 min. → 5-35°C: 2 to 3 min. →85°C: 30 min. →5-35°C: 2 to 3 min.)		
	DF59M	45mΩ min.	1000MΩ max.	5 cycles		
	DF59-*P-2C	30mΩ min.				
		■Contact resistar	ice	■Number of insertion and withdrawal force		
	DF59-*P-2FC			30 times		
6. Operating Life	DF59-*P-2FC/SP DF59S/SN	50mΩ min.		10 times		
	DF59M	45mΩ min.		20 times		
	DF59-*P-2C	30mΩ min.		30 times		
7.Resistance to soldering heat		n which affect the p	performance.	Reflow : Depends on recommended temperature profile. Hand soldering : Soldering iron temperature 350 \pm 10°C, 3 sec.		

Note 1 : Including temperature rise caused by current flow.

Note 2 : The term "storage" refers to products stored for long period of time prior to mounting and use.

Operating temperature and humidity range covers connectors after installation, storage, shipment or during transportation.

Note 3: The rated voltage is the applied voltage when connectors are mounted parallel to each other on the PCB with a distance of 1.6mm or more between them. Hirose recommends his mounting distance.

This mounting distance is required in order to prevent creepage between the printed wiring to maintain an effective voltage of 300V, according to IEC 60664 and JIS C 60664 standards.
