WADVPRIME-UF-33 Features

(1) Year Advantage Prime Service Plan for DX 50-68 kW

Comprehensive service packages that allow you to design the coverage you need to operate your solution efficiently, minimize downtime and manage costs.

Comprehensive escalation and corrective actions process	In order to resolve outages as quickly as possible and to keep such event from recurring, APC follows a rigorous escalation process that includes in depth root cause discovery and corrective actions practices.
Consumables replacement	From air filters and fuses to fans and capacitors, APC will replace all parts on the system that expire as a result of normal wear and tear.
Experienced Certified Field Service Engineer	Our factory trained Field Service Engineers are rigorously trained and tested on how to efficiently service our products, as well as on safety practices and electrical codes, offering our customers the highest level of service available in the industry today.
Free firmware upgrades	Part of maintaining your system is ensuring the unit is operating with the most recent firmware version. Firmware upgrades are provided at no extra charge. All Preventive Maintenance contracts include free firmware upgrades.
Functional verification	During each Preventive Maintenance visit, our Certified Field Service Engineers will run tests to verify your system is functioning correctly in all operational modes, stopping problems before they start.
Logistics coordination	APC will coordinate the logistics of your installation, from hardware delivery to scheduling installation technicians, ensuring a smooth installation process from start to finish.
On site troubleshooting	While on site, our APC Certified Field Service Engineers, backed by years of industry experience, will diagnose any errors directly, ensuring accuracy of any corrective actions taken.
Proactive monitoring	By utilizing customer-specific and global trending techniques, remote monitoring professionals can proactively identify and anticipate physical infrastructure threats before they occur.
System cleaning	Cleaning your system of dust and grime accumulated during normal operation will extend the life of the hardware.

Service Plans Features & Benefits

Serviceability

Environmental inspection	In order to ensure that your system is installed in a suitable environment for optimal functionality, we will inspect the site for conditions that might damage your system, such as excessive heat or humidity.
Service Summary Report	Provides a detailed report of work performed including recommendations for service to ensure optimal performance
Technical support	Our experienced technical support engineers are available to answer your questions, giving you peace of mind knowing the help you need is there when you need it.

Onsite diagnostics & repair	While on site our Certified Field Service Engineers will diagnose, repair and test the unit to ensure optimal performance.
Flexible on site response times	Choose an on site response time that best meets your business requirements and budget
Labor and travel expenses included	Travel and labor expenses are included in most service contracts. Please see the statement of work for the service specifics.
Experienced Certified Field Service Engineer	Our factory trained Field Service Engineers are rigorously trained and tested on how to efficiently service our products, as well as on safety practices and electrical codes, offering our customers the highest level of service available in the industry today.
