ø22 TW Series Switches & Pilot Lights

General-purpose switches & pilot lights for various applications Heavy-duty type for high-level protection against harsh environment

- Highly reliable HW contact blocks are used.
- Degree of protection: IP65 (IEC 60529)
- UL and CSA approved, EN compliant

Applicable Standards	Mark	File No. or Organization
UL508		UL Listing File No. E68961
CSA C22.2 No.14		CSA File No. LR21451
EN60947-5-1		TÜV Rheinland
		EU Low Voltage Directive
GB14048.5		CCC No. 2003010305027380 (pilot light: No. 2007010304226713)

Specifications and Ratings

Contact Ratings

Contact Block	Rated Insulation Voltage	600V
	Rated Continuous Current	10A
	Contact Ratings by Utilization Category IEC 60947-5-1	AC-15 (A600) DC-13 (P600)

Characteristics

Contact Ratings by Utilization Category

Operational Voltage			24V	48V	50V	110V	220V	440V
Operational Current	AC 50/60 Hz	AC-12 Control of resistive loads and solid state loads	10A	—	10A	10A	6A	2A
		AC-15 Control of electromagnetic loads (> 72 VA)	10A	—	7A	5A	3A	1A
	DC	DC-12 Control of resistive loads and solid state loads	8A	4A	—	2.2A	1.1A	—
		DC-13 Control of electromagnets	4A	2A	—	1.1A	0.6A	—

Minimum applicable load: 3V AC/DC, 5 mA (applicable range may vary with operating conditions and load types)

For the switches & pilot Lights listed below, the rated current (load switching current) is reduced to a half of the rated operational current of the contact block. The rated insulation voltage (600V) and the rated thermal current (10A) remain unchanged.

- Selector switches and illuminated selector switches with contact code 2S, 3S, 4S, 2R, or 4R.

HW-C (Contact Block)

Contact Blocks

Contact	NO	NC	NO (early make)	NC (late break)
Housing	Blue	Purple red	Blue	Purple red
Push Rod	Green	Red	Black	White

Incandescent Lamp Ratings (LS)

Part No.	LS-6	LS-8	LS-2	LS-3
Lamp Base	BA9S/13			
Rated Voltage	6V AC/DC	12V AC/DC	18V AC/DC	24V AC/DC
Wattage	1W (6.3V)	1W (18V)	1W (24V)	1W (30V)
Voltage Marking	Die stamped on the base			
Life (reference value)	Approx. 1,000 hours minimum (mean value when used on the rated voltage)			

LED Lamp Ratings (LSTD)

Part No.		LSTD-6②	LSTD-1②	LSTD-2②
Lamp Base		BA9S/13		
Rated Voltage		6V AC/DC	12V AC/DC	24V AC/DC
Voltage Range		6V AC/DC $\pm 10\%$	12V AC/DC $\pm 10\%$	24V AC/DC $\pm 10\%$
Current Draw	AC	8 mA	11 mA	11 mA
	DC	A, R, W: 7 mA, G, PW, S: 5.5 mA	10 mA	10 mA
Color Code ②		A (amber), G (green), PW (pure white), R (red), S (blue), W (white) Use a pure white LED lamp for yellow illumination		
Lamp Base Color		Same as illumination color		
Voltage Marking		Die stamped on the base		
Life (reference value)		Approx. 50,000 hours (until the brightness reduces to 50% of the initial value when lit at complete direct current of the rated voltage under 25°C environment.)		
Internal Circuit		  LED Chip  Protection Diode  Zener Diode  Resistor		

Specifications

Operating Temperature	-25 to +50°C (no freezing)
Storage Temperature	-40 to +80°C
Operating Humidity	45 to 85% RH (no condensation)
Contact Resistance	50 mΩ maximum (initial value)
Insulation Resistance	100 MΩ minimum (500V DC megger)
Dielectric Strength	Between live and dead metal parts: 2,500V AC, 1 minute (Full voltage illuminated units: 2,000V AC, 1 minute)
Vibration Resistance	Damage Limits: 30 Hz, amplitude 1.5 mm Operating extremes: 5 to 55 Hz, amplitude 0.5 mm
Shock Resistance	Damage limits: 1,000 m/s ² Operating extremes: 100 m/s ²
Mechanical Life (minimum operations)	Pushbuttons, Illuminated pushbuttons Momentary: 5,000,000 Others: 500,000 Selector switches: 500,000 Illuminated selector switches: 500,000
Electrical Life (minimum operations)	Pushbuttons: 500,000 (switching frequency 1,800 operations/h, duty ratio 40%) Illuminated pushbuttons: 500,000 (switching frequency 1,800 operations/h, duty ratio 40%) Selector switches: 500,000 (switching frequency 1,200 operations/h, duty ratio 40%)
Weight (approx.)	68g (ABW122) 33g (APW122D) 89g (ALW22222D) 68g (ASW222) 107g (ASW2K22) 90g (ASLW22222D) 95g (APW126D)

Mounting Hole Layout

Note 1: The 3.2 mm recess is for preventing rotation and is not necessary when the nameplate or anti-rotation ring is not used.

Note 2: The minimum mounting centers are applicable to switches with one layer of contact blocks (two contact blocks). When two layers of contact blocks are mounted, determine the minimum mounting centers in consideration of convenience for wiring.

- 2-position, 3-position lever selector switch: 39 mm minimum
- 4-position, 5-position lever selector switch: 50 mm minimum

Degree of Protection

Part No.	Unit	NEMA ICS 6-110	IEC 60529
A****	Pushbuttons, pilot lights, illuminated pushbuttons, and selector switches	Type 1, 2, 3, 3R, (3S), 4, 5, 12,13	IP65
	Illuminated selector switches, key pushbuttons, key reset pushbuttons, and key selector switches	Type 1, 2, 3R, 5, 12, 13	IP54

Note: (3S) of NEMA ICS 6-110 applies to the pilot lights with round lens.

Ordering Information

- Specify an operator or lens color code in the Part No.
- All standard units are UL, CSA, EN, and TÜV approved.

- When a terminal cover is required, order an applicable terminal cover referring to page 29.

Part No. development charts shown below can be used to specify switches/pilot lights other than those listed on the following pages. Gold-plated silver contacts are also available.

Pushbuttons

ABW1 11 R - MAU

- Optional contact
- MAU: Gold-plated silver contact
- Button color code
- Contact arrangement code

10: 1NO	01: 1NC
11: 1NO-1NC	20: 2NO
02: 2NC	21: 2NO-1NC
12: 1NO-2NC	30: 3NO
03: 3NC	31: 3NO-1NC
22: 2NO-2NC	13: 1NO-3NC
40: 4NO	04: 4NC

Note:

- Push-pull type AYW4 can have a maximum of two contact blocks.

Illuminated Pushbuttons

ALFW2 126 13 D R - MAU

- Optional contact
- MAU: Gold-plated silver contact
- Lens color code
- Contact arrangement code

10: 1NO	01: 1NC
11: 1NO-1NC	20: 2NO
02: 2NC	21: 2NO-1NC
12: 1NO-2NC	30: 3NO
03: 3NC	31: 3NO-1NC
22: 2NO-2NC	13: 1NO-3NC
40: 4NO	04: 4NC
- Operating voltage code

Note:

- Push-pull type AYLW4 can have a maximum of two contact blocks.

Pilot Lights

APW2 126 D R

- Lens color code
- Operating voltage code

Key Selector Switch

ASW 2 K 20 B - MAU

- Optional contact
 - MAU: Gold-plated silver contact
 - Key removable position code
 - 2-position
 - Maintained
 - (blank): Removable in all positions
 - B: Removable in left only
 - C: Removable in right only
 - Spring return from right
 - (blank): Removable in left only
 - Spring return from left
 - (blank): Removable in right only
 - 3-position
 - Maintained
 - (blank): Removable in all positions
 - B: Removable in left and center
 - C: Removable in right and center
 - D: Removable in center only
 - E: Removable in right and left
 - G: Removable in left only
 - H: Removable in right only
 - Spring return from right
 - (blank): Removable in left and center
 - D: Removable in center only
 - G: Removable in left only
 - Spring return from left
 - (blank): Removable in right and center
 - D: Removable in center only
 - H: Removable in right only
 - Spring return two-way
 - (blank): Removable in center only
- Contact arrangement code
- Number of positions

Note:

- See pages 26 to 28 for contact arrangement codes.
- The key cannot be removed in the return position.

Selector Switch

ASW 2 L 11 - MAU

- Optional contact
- MAU: Gold-plated silver contact
- Contact arrangement code
- Operator type
 - (blank): Knob
 - L: Lever
- Number of positions

Note:

- See pages 26 to 28 for contact arrangement codes.

Illuminated Selector Switch

ASLW 2 16 22 D R - MAU

- Optional contact
- MAU: Gold-plated silver contact
- Lens color code
- Contact arrangement code
- Operating voltage code
- Number of positions

Note:

- See pages 26 to 28 for contact arrangement codes.

• On the 2-position selector switches marked with * above, the contact operation is reversed as follows.

- On the contact arrangement chart marked with ★ in the table above, the rated current (load switching current) is reduced to a half of the rated current of the contact block. The rated insulation voltage and the rated thermal current remain unchanged.
- Selector switches with one or three contact blocks contain a dummy block.
- Knob operator: White indicator on black knob

• On the 2-position selector switches marked with * above, the contact operation is reversed as follows.

- On the contact arrangement marked with ★ in the table above, the rated current (load switching current) is reduced to a half of the rated current of the contact block. The rated insulation voltage and the rated thermal current remain unchanged.
- Selector switches with one or three contact blocks contain a dummy block.
- Lever operator: White indicator on black lever

Accessories

Shape	Material	Part No.	Ordering No.	Package Quantity	Dimensions
	Rubber (nitril)	OR-14	OR-14	1	Used to tighten the round bezel when installing the TW switch/pilot light onto a panel. 
	Rubber (nitril)	OR-55	OR-55	1	Used to install and remove LED/incandescent lamps. 
	Metal (zinc-plated) Rubber (nitril)	TW-KC1	TW-KC1	1	Used to remove contact blocks, transformers, lenses and adapters. Can also be used to determine panel thickness adjustment. 
	Metal (nickel-plated)	TW-KQ2	TW-KQ2	1	Used to tighten the locking nuts inside of the square bezel. This tool can be inserted into the OR-14 locking ring wrench. 
	Metal (zinc-plated)	OGL-31	OGL-31PN10	10	Used to prevent the operator from rotating. Generally used when using no nameplates on selector switches. 
	Rubber (black) (nitril)	OB-31	OB-31PN05	5	Used to plug unused ø22.2mm mounting holes. 
	Diecast Metal (locking ring: polyamide)	LW9Z-BM	LW9Z-BM	1	- Used to plug unused ø22.2mm mounting holes. - Tightening torque: 1.2 N·m - Degree of protection: IP66 (without the 3.2mm recess in the mounting hole) 
	Plastic (polyamide)	LW9Z-BP1	LW9Z-BP1	1	- Used to plug the unused ø22.2mm mounting holes. - Tighten the locking ring to a torque of 2.0 N·m. - IP65 - Mounting panel thickness: 0.8 to 6 mm
	Polyamide	HW-VL1	HW-VL1PN10	10	Used to prevent contact between adjacent lead wires when units are mounted closely. Barriers should be always used in close mounting. 

Accessories

Shape		Material	Part No.	Ordering No.	Package Quantity	Description
Contact Rubber Boot 	For 1 layer of contact blocks (2 contact blocks)	Rubber (nitril)	OCW-99	OCW-99	1	• Oiltight rubber boot used for pushbuttons and selector switches. • Temperature range: -5 to +60°C • Black 
	For 2 layers of contact blocks (4 contact blocks)		OCW-299	OCW-299	1	
Button Clear Boot 	For flush pushbuttons (ABW1/AOW1)	Rubber (EPDM)	OC-31	OC-31	1	• Used to cover and protect pushbuttons where units are subject to water splash. Not suitable for outdoor use or where the units are subject to oil splash. 
	For extended pushbuttons (ABW2/AOW2)		OC-32	OC-32	1	
Button Cover 	For flush pushbuttons (ABW1/AOW1)	Rubber (nitril)	OCW-10①	OCW-10①	1	• Metallic bezels covered with rubber boot to enhance waterproof and oiltight characteristics. • Button is installed in the cover. Remove the button from the pushbutton before using the button cover. • ①: B (black), G (green), R (red), Y (yellow) 
	For extended pushbuttons (ABW2/AOW2)		OCW-11①	OCW-11①	1	
Padlock Cover 		Polyarylate (gasket: nitril rubber)	HW9Z-KL1	HW9Z-KL1	1	• Used to protect momentary and maintained pushbuttons, illuminated pushbuttons, knobs selector switches, and key selector switches.

	380V AC		TWR5386	
	400/440V AC		TWR546	
	480V AC		TWR5486	

Specifications

Operating Voltage	100/110V AC, 115/120V AC, 200/220V AC, 230/240V AC, 380V AC, 400/440V AC, 480V AC (50/60Hz)
Current Draw	2.4 VA
Rated Insulation Voltage	600V
Insulation Resistance	100 MΩ minimum (500V DC megger)
Operating Temperature	-30 to +60°C (no freezing)
Storage Temperature	-40 to +80°C (no freezing)
Operating Humidity	35 to 85% RH (no condensation)
Vibration Resistance	Damage Limits: 30 Hz, amplitude 1.5 mm Operating extremes: 5 to 55 Hz, amplitude 0.5 mm
Shock Resistance	Damage limits, Operating Extremes: 1,000 m/s ²
Dielectric Strength	2,500V AC, 1 minute
Terminal Screw	M3.5
Applicable Wire	2 mm ² maximum, 2 wires maximum
Weight (approx.)	87g

- Use plastic end clip BC9Z-E/NS35N when using 400/440V AC primary voltage transformers.

Safety Precautions

- Turn off the power to the TW series switches & pilot lights before starting installation, removal, wiring, maintenance, and inspection of the products. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid a burn on your hand, use the lamp holder tool when replacing lamps.
- For wiring, use wires of a proper size to meet the voltage and current requirements. Tighten the M3.5 terminal screws to a tightening torque of 1.0 to 1.3 N·m. Failure to tighten terminal screws may cause overheat and fire.
- Use HW-C contact blocks for the TW series. Do not replace with or add conventional TW series contact blocks. Using a different type of contact block may lead to malfunction.

Contact Block

TW
Contact Block

Instructions

Panel Mounting

Panel thickness adjustment ring is used for the TW series. To attach the TW series to the panel, follow the procedures below.

Mounting order		① Panel Thickness Adjustment	② Attaching the Unit to the Panel with the Bezel	③ Attaching the Button, Lens, and Knob		
		 Panel thickness adjustment ring	 Panel Bezel	 Panel Lens		
Remarks			Attach the unit with the panel thickness scale facing up.	Installation method		
				<table><tr><th>Type</th><th>Method</th></tr><tr><td>Flush/Extended pushbuttons, Square lens, Selector operator</td><td>Press in</td></tr><tr><td>29mm/40mm mushroom button/lens, Dome lens</td><td>Screw in</td></tr></table>	Type	Method
Type	Method					
Flush/Extended pushbuttons, Square lens, Selector operator	Press in					
29mm/40mm mushroom button/lens, Dome lens	Screw in					
Tools	Locking ring wrench		For tightening or removing round bezels.			
	Nut locking wrench		For tightening or removing square bezels.			
	Contact block removal tool	Panel thickness adjustment	For installing or removing water-proof lenses after the bezel is attached.	For installing or removing round lenses.		

Adjusting Panel Thickness

The panel thickness ring provides adjustment from 1 to 6 mm in 1-mm increments. Set the panel thickness to line A. Rotate the ring until the desired thickness indication around the periphery is aligned with line A, as shown below.

Note: When a nameplate or an anti-rotation ring is used, add 0.8mm to the panel thickness.
 Total thickness
 = Panel thickness + 0.8mm (nameplate or anti-rotation ring thickness)

Using the Contact Block Removal Tool to Adjust Panel Thickness

Panel thickness can easily be adjusted to the values shown below by inserting the contact block removal tool between the adjustment ring and base.

Mounting into Panel Cut-out with Bezel

Insertion into Panel Cut-out

Insert the base into the panel cut-out making sure that the panel thickness scale is facing up.

Round Bezel

All round bezels are screw-in type. Be sure to use the locking ring wrench to tighten the bezel.

- Recommended tightening torque is 2.0 N·m.

Square Bezel

1. Insert the base plate from the front.

2. Insert the lock nut. For easy installation, use the nut locking wrench.

3. Mount the square bezel. The bezel will snap onto the base plate.

Installing Buttons, Lenses, and Operators

Lens Structure and Marking Plate

All square lens units are marking types. To engrave on the marking plate, remove the marking plate from the lens.

[Square Pilot Lens]

[Square Illuminated Pushbutton]

[Round Marking]

1. **Removing the Square Lens**
Insert the screwdriver into the recess of the lens and lightly push out the lens.

2. **Removing the Marking Plate**
 - Pilot Light
Insert the screwdriver into the recess of the lens.

- Illuminated Pushbuttons
Insert the screwdriver into the hook and lightly push out the lens.

3. Other Notes

The square lens of the illuminated pushbutton cannot be used without waterproof lens. Always use the waterproof lens. Be sure to use the marking plate even when it is not engraved.

Marking Plate Engraving Area

Round	Mushroom	Square (Pilot Light)	Square (Illuminated Pushbutton)

Note: The depth of the engraving must be within 0.5 mm.

Installing Round Lens and Waterproof Lens

When installing or removing round lens of pilot lights and illuminated pushbuttons and waterproof lens of square pilot lights and illuminated pushbuttons, press the rubber part of the contact block removal tool onto the lens or waterproof lens for secure tightening and easy removal.

Installation of Selector Operators

1. The shaft of each selector or illuminated selector switch has a recess to identify in which direction to install the operator. Align the operator with the recess and press in the operator.
2. Press color insert (non-illuminated) into the operator. The color insert retains the operator

2-Position, 90°	3-Position, 45°	4-Position, 45°	5-Position, 30°

[Example]

Standard Position

The non-illuminated operators can be installed in positions other than the standard position as shown above.

Removing the Operator

1. Removing the Color Insert

Insert a flat screwdriver into the recess of the color insert. Turn the screwdriver to push out the insert from the operator

2. Removing the Operator (Non-illuminated)

Push the operator sideways as shown in the left photo to remove the operator.

3. Removing the Operator (Illuminated)

Insert a flat screwdriver into the recess of the operator and turn the screwdriver to remove the operator.

Removing Contact Blocks, Transformers and Full Voltage Adapters

Insert the end of the contact block removal tool into the snap-fit latch of the contact block (or transformer, full-voltage adapter) and pull the tool as shown below.

Collective Mounting

When mounting the units closely in a horizontal row on 30-mm centers, use optional barriers to prevent interconnection between adjoining terminals. The barriers can be attached simply by pressing them onto the sides of contact blocks.

Tightening Torque for Terminal Screws

Tighten the M3.5 terminal screws to a torque of 1.0 to 1.3 N·m.

Installation of LED Illuminated Units

- Note the polarity for wiring when connecting to DC-DC converter unit.

Terminal No.	Polarity
X1	Positive
X2	Negative

- Transformer type units are recommended for use in areas subjected to noise.

- Notes for Pure White LED Lamps

- Do not use the pure white LED outdoors, otherwise it will lead to the degradation of brightness and color. Do not remove or apply shock to the cap on the pure white LED lamp, otherwise it may break or damage the cap.
- For the pure white LED, use a white lens. The illumination color will be dull if a different color is used.

Notes on LED Illuminated Units

LED lamps consist of semiconductors. If the applied voltage exceeds the rated voltage, LED elements may deteriorate due to overheat, resulting in significant decrease in luminance, hue change, or failure of lighting. Also, if an extraneous noise, transient voltage, or transient current is applied to the circuit, similar effects may occur. When using LED lamps, observe the following instructions.

Rated Voltage

The LED lamps are rated at 6V, 12V, or 24V AC/DC, and can be used within $\pm 10\%$ the rated voltage of either AC or DC.

DC Power

- Switching power supply**
Regulated voltage from switching power supply is best suited. Make sure to use within the rated voltage of the LED lamp.
- Rechargeable battery**
Note that the battery voltage may exceed the rated voltage of the LED lamp while the battery is being charged and immediately after the charging is complete. Be sure to use the LED lamp on a voltage of $\pm 10\%$ the rated voltage.
- Full-wave rectification**
Since the LED lamp is AC/DC compatible, a diode bridge for rectification is not necessary. If the LED lamp is used on a full-wave rectification current through a diode bridge, the rectifier diodes will reduce the voltage, resulting in lower luminance.
- Single-phase half-wave rectification**
This is not suitable for the power source of LED lamps. Use constant-voltage DC power.

Noise

LED elements deteriorate due to extraneous noise, resulting in significant decrease in luminance, hue change, or failure of lighting. When such effects are anticipated, take a protection measure shown below, such as RC elements or a surge absorber.

[Protection Example 1] For AC circuit

[Protection Example 2] For DC circuit

Countermeasures against Dim Lighting

- Leakage currents through the transistors or a contact protection circuit may cause the LED lamp to illuminate dimly even when the output is off.
- When the LED lamp is illuminated by a transistor output, take the following measure.

[Circuit Example]

Connect shunt resistor R in parallel with the LED lamp.

Specifications and other descriptions in this brochure are subject to change without notice.
