Souriau 853 series

Product range

Souriau 853 series

Standard version See Page 10

Scoop-proof See Page 17

- For blind mate connection
- ESC11 qualified

Quadrax & power contacts See Page 27

- Quadrax contacts for high speed Ethernet networks
- Power contacts for high power current under temperature and vibration
- ABS qualified solution

Integrated backshell See Page 21

- For weight saving solutions
- ESC15 and ESC16 qualified

Hermetic version See Page 30

- For hermetic interface or space constrained application
- Leak rate < 10⁻⁷ atm.cm³/s
- Solder cup & PC tail contacts

(1) Only developed for square flange receptacle all classes and stainless steel plug (for other configuration, please consult us)

(2) Quadrax contact only

8533 series - standard version

Technical specifications

Description

- Stainless steel screw coupling connector derived from MIL-C-83723, designed for use in harsh aviation environments
 - High vibration resistance
 - High temperature resistance (up to 260°C)
 - Fireproof (1100°C)
- Qualified to EN2997 and ESC10 standards
- Large array of EN3155 and ESC30 qualified crimp contacts
 - Size 12, 16 & 20 standard contacts
 - Size 12, 16 & 20 thermocouple contacts for temperature measurement
- Fuel immersion version available

Mechanical

Shell

Aluminum alloy (class R, W and A)
Stainless steel (class K, E and S)

Plating

Nickel (class R and S)
Olive green cadmium (class W)
Black anodized (class A)
Passivated (class K and E)

Grommet and seal

Silicone elastomer

Insulator

Thermoplastic

Contact body

Copper alloy

Contact plating

Gold over nickel

Contact retention

Size 20: 90 N
Size 16: 110 N
Size 12: 130 N

Mating cycles

250 mating cycles (class R, W and A)
500 mating cycles (class K, E and S)

Shock

300 m/s² (30g) during 3 ms

Vibration

Random 5 Hz to 2000 Hz at 1G²/Hz
(2 x 8 hours)

Electrical

Dielectric withstanding

Altitude	Service I
Sea level	1500 Vrms
15 000 m	600 Vrms
21 000 m	400 Vrms
33 000 m	200 Vrms

Contact resistance

Initial contact resistance at ambient temperature per EN 2997 and EN3155

Contact size	20	16	12
Resistance mΩ	7.3	3.8	3.5

Insulation resistance

5000 MΩ at 500 Vdc

Max current rating per contact

Contact size	20	16	12
Rating (A)	7.3	13	23

Electrical continuity

5 mΩ max with RFI shielding
60 mΩ without RFI shielding

Shielding

To 100 MHz at 1 GHz attenuation
65 dB

Lightning strike (3K & 3E classes)

15A according D0160, wave 5A

Environmental

Operating temperature

- Class W: -65° to +175°C (-85° to +347°F)
- Class R, A and K: -65° to +200°C
- (-85° to +392°F)
- Class E and S: -65° to +260°C (-85° to +500°F)
- Fuel tank long term immersion version specification 22 limited to +105°C max

Leakage

Per 2591-312:

Method B differential pressure: 100kPa
Maximum leakage flow: 16x10⁻⁶ m³/h

Salt spray

48 hours (class R)
500 hours (class W, K, E and A)

Resistance to fluids

MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL-L 7808 - MIL-C 25769 - MIL-A 8243

Fire resistance

Per EN 2591-318:
6 min under a 1100°C flame without electrical perturbation, plus 14 min with no flame propagation (ES class)

Fuel resistance

Standard version

Per EN2997

Long term immersion

(specification 22):

Per PrEN3645: 3 cycles of
96 hours in fuel

Standard connectors - part numbers

Description

- Stainless steel screw coupling connector designed for use in harsh aviation engine environments
 - High vibration resistance
 - High temperature resistance (260°C)
 - Fireproof (1100° C)
- Scoop-proof design enables blind mating
- Qualified to ESC11 standard
- Fully interchangeable and intermateable with ESC16 / 8536 connectors (integrated backshell version)
- Large array of crimp contacts
 - Size 16 & 20 standard contacts
 - Size 16 & 20 thermocouple contacts
- Fuel immersion version available

Mechanical

Shell

Passivated stainless steel

Grommet and seal

Description

- Stainless steel screw coupling connector designed for use in harsh aviation engine environments
 - High vibration resistance
 - High temperature resistance (200°C / 260°C)
 - Fireproof (1100°C)
- Integrated backshell with a full scoop-proof connection (8536 series)
- Qualified to ESC15 (8535 series) and ESC16 (8536 series) standard, and per the new EN2997 issuance
- Fully interchangeable
 - 8535 series with BACC 63 CM-CN, EN2997 and ESC10 connectors
 - 8536 series with ESC11 connectors
- 8535 series intermateable with BACC 63 CM-CN
- Large array of crimp contacts (same as for 8533 series)
 - Size 12, 16 & 20 standard contacts
 - Size 12, 16 & 20 thermocouple contacts

Description

- Innovative connector that combines resistance to high vibrations and high temperatures with high power
 - Up to 80 amps continuous rating at 260°C ambient temperature
 - 20% space-savings compared with other solutions
- Contact size 6 & 4, as well as the ability to use Quadrax contacts in size 6 cavity layouts
- Standard strain relief backshell or spacer accessory to adapt to specific backshells
- Airbus ABS 1340-1343, 426-1427 and 1452 qualified
- Grounded insert option for optimized Quadrax performance
- Ideal for electro-mechanical actuator power supply, alternator and starter applications

8533 series - hermetic version

Technical specifications

Description

- EN2997 and ESC10 qualified screw coupling connector
 - High vibration resistance
 - High temperature resistance
- Glass sealed hermetic
 - High hermeticity performance
 - Compact low profile
- Several mounting styles
 - Compact solder mount receptacle
 - Easy to install square flange
 - Easy to replace jam nut receptacle
- Fully interchangeable with MIL 83723 hermetic connectors
- Special fuel tank versions available
- 230V qualified versions used to reduce cable weight with higher voltage

Signal and power contacts

Introduction

- Firewall contacts designed for high vibration and high temperature
- Each contact type is qualified and validated by qualification organizations or aerospace manufacturers
 - Size 12, 16 & 20 signal contacts: EN3155 and ESC30 qualified
 - Size 12, 16 & 20 thermocouple contacts: EN3155 and ESC30 qualified
- Crimping, insertion and extraction tools are available

Signal and power contacts

Crimp contacts 175°C and 200°C

Size	Barrel	20	18	16	14	28	12
Stripped length of cable mm ^{±0.5}		4.5	4.5	6.8	6.8	6.8	6.8

Insertion of wire in contact barrel

When inserting the stripped wire into the contact barrel check that no strands are left outside and that the wire is visible through the wire inspection hole in the barrel.

Important:

- Slide any accessories over wire strands before carrying out the following operations.
- Contacts are inserted and extracted from the rear of the connector.

Insertion of the contacts

1 - Engage the crimp cable / contact assembly into the longitudinal slot of the plastic tool (colored tip). Slide the tool down the cable until the tip of the tool abuts the contact retention shoulder

2 - Introduce the contact into the required contact cavity in the insulator, pushing tool axially, until the contact snaps into position in clip.

3 - Withdraw the tool from rear. Check that contact is firmly locked by pulling wire gently. When connector is fully loaded, check the position of contact tips. They should all be in the same plane. Note: For larger sizes of cable which are stiff enough, manual insertion without tool is preferable.

Extraction of the contacts

1 - Engage the appropriate cable into the longitudinal slot of the tool with the white tip towards connector.

2 - Slide the tool down towards the contact. Insert the tool in the insulator until it abuts the contact shoulder.

3 - Holding the tool-contact and cable assembly together, remove them simultaneously.
