Conformity to RoHS Directive

High Voltage Ceramic Capacitors
Commercial Grade

Low Dissipation at High Frequency
CK45-RR Series

FEATURES

- High voltage ceramic capacitors series, low dissipation factor and higher reliability has been achieved through the use of TDK original dielectric and copper for electrode material due to nice matching of the ceramic dielectrics material for low dissipation factor, and copper for electrode.
- Mainly used as withstand voltage protection for power transistors and diodes of switching power sources, for controlling noise, and for absorbing highfrequency pulses.
- Low dissipation factor, and decreased self-heating temperature in the high frequency, and high voltage application.
- These products shall conform to RoHS Directive due to lead(Pb) free of lead wire and internal solder material.
- Compatible with halogen-free external resin coating.

OPERATING TEMPERATURE RANGE: -25 to +125°C

(The maximum operating temperature of 125°C includes capacitor self-generated heat of up to 20°C.)
