

## APS00B

### High Resolution Magnetic Angular Position Sensor IC

#### DESCRIPTION

Honeywell's APS00B High Resolution Magnetic Angular Position Sensor IC (Integrated Circuit) is a miniature surface mount device for angular or rotary displacement designed for magnetic saturating field sensing.

The APS00B creates an analog output voltage that varies with the direction of the magnetic flux passing over the IC surface. It contains dual saturated-mode Wheatstone bridges that generate quadrature (sine and cosine) signals to provide an extended range of angular measurements up to 180°.

This product is a cost-effective and space-efficient solution for high volume OEM designs. Potential applications include position sensing, rotary speed and angle detection, and non-contact precision location measurement systems.

#### FEATURES AND BENEFITS

- Wide angular range allows measurements of  $\pm 90^\circ$  without additional components make this device suitable for a variety of angular sensing applications;  $\pm 180^\circ$  measurement is possible with external components
- Resolution capability of less than  $0.05^\circ$  helps improve overall system accuracy
- Absolute sensing means no indexing is required and the exact target position is known, simplifying the system design
- Dual 4-element Wheatstone bridges provide a passive element, low-noise design, helping improve system performance
- Small, SOIC-8 surface mount package saves room on the PC board when compared to larger IC packages and components
- RoHS-compliant materials meet Directive 2002/95/EC
- APS00B sensor ICs use Honeywell's Anisotropic Magnetoresistive (AMR) technology that provides advantages over Hall-effect based magnetic sensors. They are able to resolve better than a tenth of a degree or a tenth of a millimeter, withstand large variations in magnet-to-sensor gaps, and exhibit insensitivity to shocks and vibrations. Honeywell's Magnetic Sensors are among the most precision and reliable position sensors in the industry.
- These surface mount devices are mounted directly on the electrical traces on a PC (printed circuit) board. They are attached by an automatic solder reflow operation which requires no hole, so it may help reduce the cost of the PC board.
- Tape and reel configuration allows use with automated pick-and-place equipment, potentially reducing assembly costs. (178 mm [7 in]) and 330 mm [13 in] reels available)
- Typical 0 MHz to 5 MHz frequency response with 190 G minimum magnetic field applied, makes this saturated mode sensor IC potentially suitable for high speed applications
- Typically requires only 5 V at 4 mA to operate (20 mW), promoting energy efficiency
- The devices measure only field direction and are virtually unaffected by shock, vibration and magnetic-source gap variations, providing a stable, reliable output
- Dual bridges with outputs  $45^\circ$  out of phase make it possible to use outputs as speed and direction signals
- Honeywell APS00A instrumentation amplifier available for additional signal processing

# APS00B

## POTENTIAL APPLICATIONS

### Transportation:

- High accuracy angular position sensing
- Rotary speed and angle detection
- Non-contact precision displacement sensing
- Speed and direction sensing

### Medical:

- High accuracy angular position sensing
- Rotary speed and angle detection
- Non-contact precision displacement sensing

### Industrial:

- High accuracy angular position sensing
- Rotary speed and angle detection
- Non-contact precision displacement sensing
- Valve position
- Robotics control

**Table 1. Absolute Maximum Ratings\***

Parameter	Min.	Max.	Unit
Supply voltage	-12	+12	V
Power Dissipation	–	200	mW
Operating Temperature	-55 [-67]	150 [302]	°C [°F]
Magnetic flux	–	no limit	Gauss

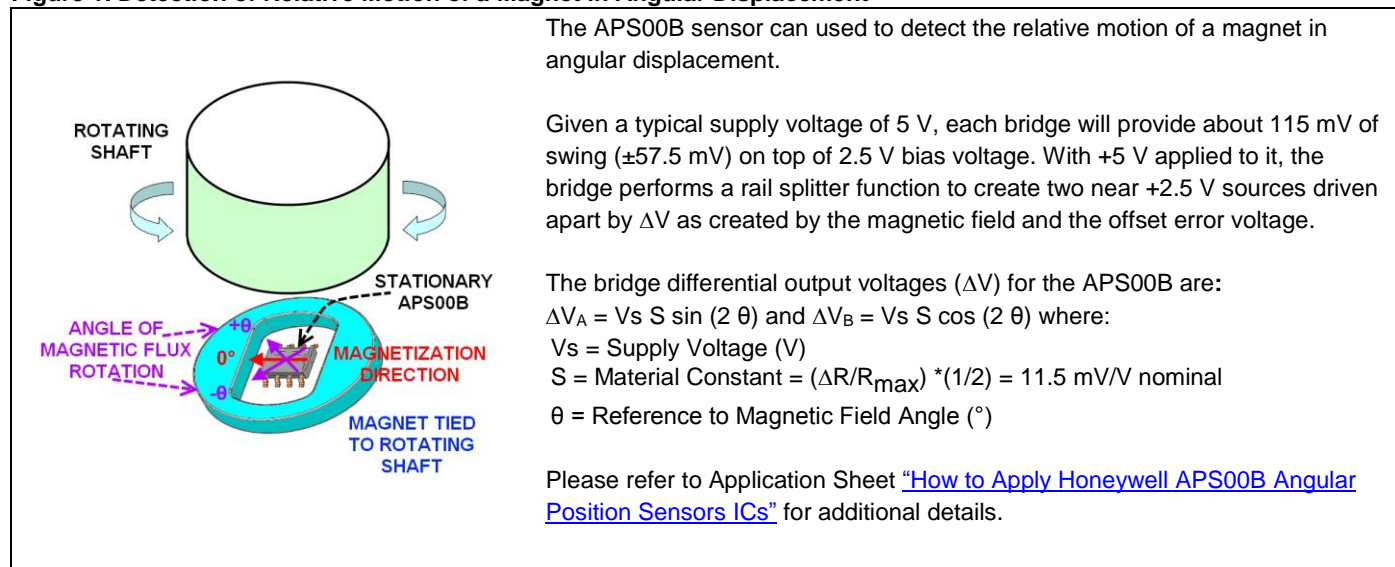

\*Absolute maximum ratings are the extreme limits the device will withstand without damage to the device. However, the electrical and mechanical characteristics are not guaranteed as the maximum limits (above recommended operating conditions) are approached, nor will the device necessarily operate at absolute maximum ratings.

**Table 2. Characteristics (At Vs = 5.0 V and Ta = 25 °C [77 °F] unless otherwise noted.)**

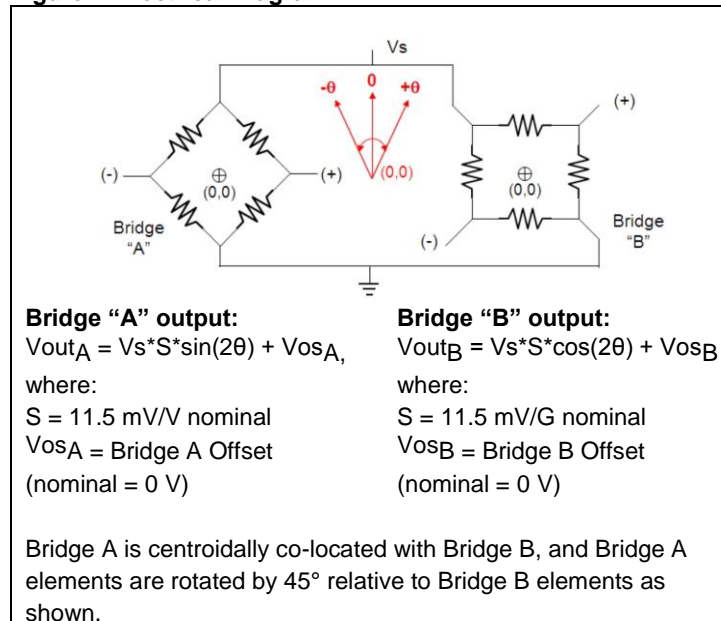

Parameter	Condition	Min.	Typ.	Max.	Unit
Supply voltage	–	–	5	12	V
Operating Temperature	–	-40 [-40]	–	150 [302]	°C [°F]
Bridge resistance	bridges are connected in parallel	0.9	1.25	1.6	kOhm
Supply current	–	–	4.0	7.0	mA
Sensitivity	around zero crossing	–	2.1	2.3	mV/°
Angle range	B > saturation field	-90	–	+90	°
Resolution	–	–	0.05	–	°
Max. output amplitude	–	47.5	57.5	67.5	mV
Min. output amplitude	–	-47.5	-57.5	-67.5	mV
Output amplitude (peak to peak)	–	95	115	135	mV
Offset voltage	–	-1	–	1	mV
Amplitude change	at 140°C [284°F]	-34	–	-43	%
Amplitude change	at -40°C [-40 °F]	24	–	31	%
Offset shift	–	-2	–	2	mV
Synchronism	(Amp A/Amp B) * 100	97	–	103	%
Synchronism shift	–	-1	–	1	%
Saturation level	<10 µV/Gauss amplitude change	60	190	–	Gauss
Bandwidth	–	0 to 5.0			MHz

## Order Guide

Catalog Listing	Description
APS00B	High resolution magnetic angular position sensor IC, SOIC-8 surface-mount package, on tape and reel, 1,000 pieces on standard reel (178 mm [7 in])
APS00B-T13	High resolution magnetic angular position sensor IC, SOIC-8 surface-mount package, on tape and reel, 4,000 pieces on large reel (330 mm [13 in])
APS00A	Instrumentation amplifier for APS00B, SOIC-8 surface-mount package, on tape and reel, 1,000 pieces on standard reel (178 mm [7 in])
APS00M	Special magnet for APS00B

### WARNING

#### PERSONAL INJURY

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

**Failure to comply with these instructions could result in death or serious injury.**

#### WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

### WARNING

#### MISUSE OF DOCUMENTATION

- The information presented in this product sheet is for reference only. DO NOT USE this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

**Failure to comply with these instructions could result in death or serious injury.**

#### SALES AND SERVICE

Honeywell serves its customers through a worldwide network of sales offices, representatives and distributors. For application assistance, current specifications, pricing or name of the nearest Authorized Distributor, contact your local sales office or:
