

Perfect Protection

High-strength engineering plastic effectively protects the internal precise electronic components from accidental falls and static damage in a complex development environment.

Note: Titan case is designed for LattePanda Alpha & Delta, not compatible with LattePanda V1.0

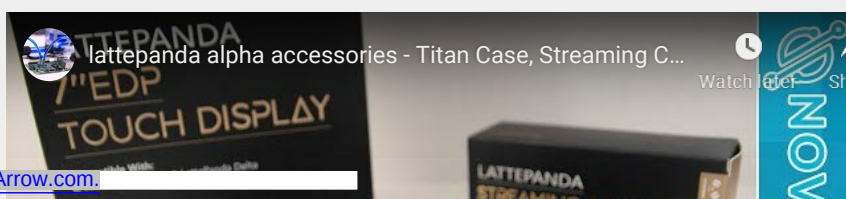

LattePanda Alpha: Screen, Case & Streaming Cable

Titan case for LattePanda Alpha / Delta (Assembly Tutorial)

LattePanda alpha accessories - Titan Case, Streaming Cable, and 7 inch EDP display

FEATURES

- Protect components
- Easy to assemble
- All interface reserved

SPECIFICATION

- Compatibility: LattePanda Alpha & Delta
- Material: ABS+PC
- Dimensions: 120*87*26 mm/4.7*3.4*1.0 Inch
- Weight: 100g

DOCUMENTS

- [Tutorial of Titan Case Assembly](#)
- [Official Website](#)

SHIPPING LIST

- Titan case x1
- M3 screws x6

REVIEW

This is a nicely designed case that's very easy put together. The cover has access panels to get at the GPIO headers on both sides of the board. Plenty of room at the bottom for the Wi-Fi / Bluetooth antennas. You can also mount your M.2 devices in the same well-vented bottom panel. The power button on the side makes it very easy to power up your unit. The power on LED's are placed on the other side making it easy to see if your board is powered up. As an Alpha user I highly recommend this case!

I don't recommend this case for the Latte Panda Alpha or even Delta. Two major design flaws with this case:

1: no ventilation holes for the airflow from the fan
this makes the case super hot, even with the brass mounting holes under the case that burned my fingers when I picked this up

2: remove the brass mounting screws under the case
as said in previous, they get super hot in use and can burn your skin

I don't recommend this case at all. I'd rather get a full aluminum heatsink, one of those Raspberry Pi aluminum heatsinks that's a entire case, with single and/or dual 40mm fans.

Hi,
Thanks for your feedback. We will bring these issues to PM.

Mhm, will there ever be an aluminium version? I mean... it looks kinda nice, but i'd prefer a nice metal finish to it + it would help cooling the board down on a huge amount...

yeah I would have loved a all aluminum heatsink case myself.
right now only aternaltive is onen from GeekWorm
Aluminum Alloy Armor Passive cooling Case for LattePanda Alpha & Delta Board (need the fan to, comes seperate)
I did order this resently and hope this one will give some improvement, but loosing protection on the sides like the titan case does as well as comfortable power button.
But this one has a copper plact to compensate for space on the alpha over delta it seems, I would love one that dont need a second item that can slide around inside the case
but from a all plastic cooler that the LP Alpha has to this one, I can only see improvement on cooling

if DF makes such case, PLEASE! make it so you can take the bottom part off without taking off the top part.
This would be verry handy for chaning out M.2 parts and battery.
and have a open gap under, if your running PCI-E riser cables from the M.2 slots

Hey Sasherz,
Thanks for the enthusiasm for the LattePanda. We will be sure to pass along this support for an aluminum case.

Hi,
For now, we have no plans for aluminium version. But your suggestion will be conveyed to product manager.

Sounds nice, thanks for the response! At the moment i'm using this case - and it is pretty good! Maybe you can get a sneak peek on it? =D

Hey,
We do not have an aluminum Titan case, however we do have a different case that is aluminum and looks quite similar to the one above. You can check it out here <https://www.dfrobot.com/pro...>
