INTRODUCTION

The Radiall miniature and subminiature rectangular multicontact connectors meet the requirements of the standard MIL-C-28748 performance requirements.

They are rugged connectors and offer high performance for high contact density.

The connectors in each series consist of an insulator with male and female contacts which include several pin sizes.

FEATURES

Each connector features a male guide at one end and a female guide at the other. This arrangement ensures polarization of the connector when coupled. These guides can be smooth (rack guides) or screw closing (fixed or rotating jackscrews).

The **contacts male or female** are made of copper base alloy plated gold over nickel. The female contacts have 4 slots which ensures perfect mating, constant contact pressure and excellent mechanical and electrical performance. The contacts have a slight amount of float in order to allow self alignment during mating.

Each series includes a different termination type; solder pot, straight or right angle solder pin for PCB, and wrapping.

The MM series

This series consists of six sizes of connector with contact arrangements for 7, 14, 20, 26, 34 and 50 size 22 contacts Ø 0.76mm / 0.030inch.

The series offers four types of terminations:

- Solder pot for wire (AWG22 max)
- Straight solder pin for PBC
- Right angle solder pin for PBC
- Wire wrap

These connectors are fitted with rack guides or fixed or rotating jackscrews at each end. A protective covering for wire terminations can be installed on the connector.

The MB series

This series consists of twelve sizes of connectors with contact arrangements for 2, 3, 5, 11, 14, 20, 25, 34, 42, 50 and 75 size 20 contacts Ø 1mm / 0.039inch.

The series offers three types of terminations:

- Solder pot for wire (AWG20 max)
- Straight solder pin for PBC
- Right angle solder pin for PBC

These connectors are fitted with rack guides or fixed or rotating jackscrews at each end.

Wires and soldered terminations for wire can be protected by either top or side entry backshells or by potting covers for 2 to 14 contacts connectors.

A range of **top and side entry backshells** with cable clamps in yellow anodized aluminium alloy are available. They are designed to protect the soldered wire connections, provide strain relief to the cable and facilitate the disengagement of the mated connectors.

Fitted with threaded posts they are suitable for connectors fitted with rack guides or fixed jackscrews. When fitted with rotating jackscrew guides they are fixed to the connectors without guides and jackscrews.

For the MB series there are also thermoplastic covers for "potting" ensuring that the terminated wires at the back of the insulator are protected.

Their mass and volume make them particularly suitable for the following applications: civil and military, in-flight equipments, instrumentation, missile, etc...

Originally developed for rack and panel assemblies they can be adapted for cable to cable applications with cable clamp backshell.

PRODUCT OVERVIEW

Detailed view of the various parts of this series connector.

ELECTRICAL

Conform to MIL-C-28748 performance requirements and UTE-C-93426 HE611 standard.

- Current rating: 5A
- Test voltage @ sea level: 1000 Vrms / 50 Hz
- Operating voltage @ sea level: 350 Vrms / 50 Hz
- Operating voltage @ 70,000 feet: 90 Vrms / 50 Hz
- Insulation resistance: > 5000 MΩ
- Contact resistance: < 5 mΩ

MECHANICAL & ENVIRONMENTAL

Conform to MIL-C-28748 performance requirements and UTE-C-93426 HE611 standard.

- Temperature range: - 55°C (-131°F) to 125°C (257°F)
- Durability: 500 mating cycles
- Shock: 100g / 6ms
- Vibration: 20g / 10-2000 Hz
- Humidity: 56 days
- Contact insertion force: 3N

MATERIALS

GUIDES AND JACKSCREWS

Stainless steel guides and jackscrews are supplied with either ISO (M2 x 0.4) or UNC (2-56 UNC) threads. The guides or jackscrews types G1 – GV – VL and VR and type of thread (ISO or UNC) required are to be defined in the part number on page 9-20.

The standard configuration of guides and jackscrews is:

- Male guide (or jackscrew) at the end nearest contact A of the female connector.
- Female guide (or jackscrew) at the end nearest contact A of the male connector.

RACK GUIDES TYPE G1

FIXED JACKSCREWS TYPE GV

The 2,3, 5 and 7 way GV jackscrews are held securely in place by two flats on the jackscrews whereas the jackscrews for the other contact arrangements have a square section to avoid rotation.

These guide and jackscrews can be used with backshells HA and HL.

LONG AND SHORT ROTATING JACKSCREWS TYPE VL – VR

Mating torque: 0.2N.m
Not available for termination style type 87
Cannot be used with backshell

NOTES:

(1) Available for male contact arrangement only.

(2) Fixing of backshells only suitable for insulator with termination style type 85 (solder pot).

(3) Backshells 34, 50 and 75 are fitted with 4 screws to be fixed to the connector block.

SPRING LOCKING SYSTEM

This simple locking system avoids accidental disconnection of connector fitted to equipment which may be subjected to severe vibration. This system can be used where connector fitted with G1 guides are used with or without backshell.

Part number of a pair: 624895

POTTING MOULDS

The plastic potting moulds are designed to fit onto the wiring side of the connectors in order that the wiring and back end can be encapsulated. They can be used with connectors fitted with G1 guides and GV and VR jackscrews.
