Pros**Cons****Best Uses**

- Increases Speed-- some.
- Unreliable Performance.
- Increased Performance

Comments about Crucial 4GB 204-pin SODIMM DDR3 PC3-8500:

Speed didn't increase as much as I expected.

Most important- first two memory cards were defective- constant problems w my computer. I ret'd them and Crucial replaced them at no charge, tho I did have to pay to ship defective ones back- expensive! I didn't think this was fair since it was Crucial's error, not mine.

MacBook
RAM Memory

3/6/2012

Comments about Crucial 4GB 204-pin SODIMM DDR3 PC3-8500:

I have the 13-inch, aluminum, late 2008 MacBook that says the max capacity for RAM memory is 6 GB, but my computer is working perfectly with two of these 4 GB memory cards. I would definitely recommend upgrading to 8 GB if you are already planning on upgrading your RAM memory. I know I read somewhere before purchasing that you needed two (I can't remember what they were) requirements to see if this mac was compatible for having 8 GB. So make sure you do your research beforehand!

- Multiple desktop applications

Comments about *Crucial 4GB 204-pin SODIMM DDR3 PC3-8500*:

I bought this memory to make new Acer 11.6 screen AO722-BZ197 netbook computer run just a bit faster than it was running with the stock 2 gigs of ram. Here is what in the real world happened. When I installed the new 4 gigs of Cruicial ram. I noticed most of the other reviews said it made the machine faster, but I bet others would like more specific information so hear it is. Start up went from approx. 1 min 50 seconds down to 1 min 15 seconds with email loading using firefox. Changing, for example from Facebook to Youtube uploads speeds were noticably faster although I can not tell you just how much faster in seconds,but it was noticable. Video streaming test have been better also... So far I have yet to have a download lag as I sometimes got before with two gigs of stock ram. I run this machine wirelessly so I am think it might even be better hard wired. So in conclusion for about 25 bucks shipped to my door by Crucial as promised and about two minutes to install who in their right mind wouldn't want to do this upgrade? Thanks, for the great service and compatible memory product! Just do it! Kit
