DESCRIPTION

The highest quality test clips in the world! These **Pomona Minigrabber Test Clips** will last you years, if not decades. Use these to make your very own test cables and jigs. Push down on the end to extend the grabber clip. When 'grabbing', the plastic shroud helps avoid shorting, a common annoyance with alligator clips.

The Minigrabber-sized clips are a great way to test and connect without soldering, these clips are best for 0.1" pitch parts and other larger components.

TECHNICAL DETAILS

- [Datasheet](#)
