

NEW MAG-MATE TERMINALS FOR FINE ALUMINUM AND COPPER MAGNET WIRE

Introductory Product Flyer

KEY FEATURES AND BENEFITS

- Terminate film-insulated copper and aluminum magnet wire
- Eliminate need for pre-stripping conductors
- Accommodate 33-27 AWG (0.18-0.36mm dia.) aluminum wire or 34-28 AWG (0.16-0.32mm dia.) copper wire
- Simultaneously terminate two magnet wires of the same size in one terminal (for splicing or bi-filing)
- Eliminate soldering or welding processes that might damage heat-sensitive wiring or components.

MAG-MATE terminals are insulation displacement connection (IDC) terminals for copper and aluminum magnet wire terminations. These new additions to the product line accommodate single or double 33-27 AWG (0.18-0.36mm dia.) aluminum magnet wires or 34-28 AWG (0.16-0.32mm dia.) copper magnet wires. The new parts offer either a solder post or a 110 series FASTON tab as an input/output option.

As with other MAG-MATE terminals, these are designed to be inserted into specified cavities in bobbins or housings by MAG-MATE terminal insertion machines, precisely positioning the magnet wires within the “U” shaped termination slots. The clean metal-to-metal interface produces stable, gas-tight electrical terminations free of oxides and other contaminants. No pre-stripping of the magnet wire is required, and there is no high temperature soldering or welding process that might damage heat-sensitive wiring or components.

A broad range of existing MAG-MATE and mini MAG-MATE terminals are available for use with magnet wire ranging from 52-12 AWG (0.254-2.05mm dia.).

Visit te.com for more details on the complete MAG-MATE terminal product line.

APPLICATIONS

- Motor windings and connections
- Coil connections
- Transformer windings and connections
- Bobbin connections
- Lighting ballasts
- Power supplies

TECHNICAL DETAILS

- Material: Tin plated brass
- Product Specification: 108-2012
- Application Specification: 114-2069

PART DETAILS

Part Number	Input/Output Type	Image	Aluminum Magnet Wire Range		Copper Magnet Wire Range		Wire Slot ID	Typical Cavity Size
			AWG	mm dia.	AWG	mm dia.		
2238061-1	Solder Post		33-31	0.18-0.23	34-33	0.16-0.18	3	1
2238060-1			31-29	0.23-0.29	33-31	0.18-0.23	4	
2238062-1			29-27	0.29-0.36	31-28	0.23-0.32	5	
2238087-1	110 FASTON Tab		33-31	0.18-0.23	34-33	0.16-0.18	3	
2238088-1			31-29	0.23-0.29	33-31	0.18-0.23	4	
2238089-1			29-27	0.29-0.36	31-28	0.23-0.32	5	

MAG-MATE Terminals for Fine Al and Cu Wire

Product Extension

MAG-MATE TERMINAL AND CAVITY

MAG-MATE terminal

Up to 4 contact points for magnet wire

Up to 2 magnet wires of the same diameter

Cavities are either integrated into coil bodies or especially designed cavity housings.

TYPICAL PLASTIC CAVITY

For reference only. Not a purchased item.
Manufacture only according to TE specification.

OUTLINE DIMENSIONS (for reference only)

Note that wire slot dimensions and ID number vary by part number.
See customer drawings on te.com for detailed dimensions.

SOLDER POST TERMINALS (2238060-1, 2238061-1, 2238062-1)

110 TAB TERMINALS (2238087-1, 2238088-1, 2238089-1)
