WITO1M2000 Features

Data Center Operation: IT Optimize, 1 Month Software Support Contract, 2000 Racks

7x24 telephone technical support	Our experienced technical support engineers are available to answer your questions, giving you peace of mind knowing the help you require is available at any given time.
Service warranty certificate	Customers receive assistance from the Service Entitlements team to ensure their product is properly recorded. An e-mail Service Entitlement Certificate provides a detailed record of the service registration, along with the service expiration date.
Software upgrades	Software support contracts entitle customers to all software upgrades and updates, ensuring access to new features and product enhancements.

Data Center Operation: IT Optimize Features & Benefits

Protection

User roles	Enable location and feature-based access through multi-user login and individual levels of user roles.
Read-only Access	Share access without risking unauthorized configuration changes.
Multi-user access	Enables several users to carry out work on the application simultaneously and merging changes from different users seamlessly.
Password Security	User-selectable password with strong password rules and reset password mechanism.

Availability

Auto-association	Increases accuracy and saves time by auto-associating discovered IT devices with the inventory, based on properties such as make, model and IP address.
GenomeTM library	The continuously growing asset library enables the software to determine power consumption without the aid of hardware sensors.
IT asset monitoring	Continual discovery and monitoring of IT components through standard protocols for accurate and current inventory management.
Live dashboard	Gain transparency to data center key performance indicators through easily configured web dashboards, displaying customizable management-level information.
IT asset auto-discovery	Saves time and increases accuracy of your managed asset inventory.
Global asset search	Quickly locate assets through free text search, and export equipment data to excel format.

Downloaded from [Arrow.com](#)

KPI data	Key performance indicators on power cost, server utilization and retirement candidates, available in report and dashboard format.
Top power consumers	Identifies servers with the highest average power usage, providing data center operators with a list of likely candidates for upgrades, load sharing or retirement.
Underutilized servers	Provides a customizable list of underutilized servers, for identifying non-utilized and underutilized servers within the data center.
Agility	
Server usage chargeback	Enables businesses to capture and assign IT costs to individual departments for accurate billing support down to the physical or virtual server level.
Track underutilized servers	Reduce costs by eliminating unnecessary servers and maximize efficiency and rack capacity.
IT power and server utilization monitoring	Determine the business usefulness for all IT assets helps eliminate underutilized servers and maximize IT capacity at the rack, row and room level.
Prevent physical server sprawl	Identify and remove non-utilized servers for optimal use of rack capacity.
Maximize rack utilization	Gain visibility into rack utilization for optimizing power, cooling and space at the rack level.
Server efficiency categorization	Provides the ability to categorize servers into non-utilized, underutilized and utilized for analyzing IT efficiency, remove non-utilized servers to recapture available capacity and virtualize underutilized servers to consolidate resources.
