Applications:

The SX-3000GB makes working with USB devices very easy. By attaching a USB hub, the SX-3000GB can integrate up to 15 USB devices to the Gigabit network. After installation all network users can share the resources. Users can access the USB devices and use them as if they were attached locally to their computers. It brings flexibility and productivity of USB devices to a whole new level in any environment including home, SOHO, school or business setting.

Features and Benefits:

- The Gigabit USB Device Server provides very fast throughput USB 2.0 Hi-speed devices.
- It instantly converts the connected device(s) for access anywhere on your network.
- Now you can enjoy the convenience and freedom of remotely using multifunction printers, scanners, storage devices, or various other USB devices.
- The included SX Virtual Link utility allows you to easily discover the USB devices on the network, connect and disconnect, and see status.
- Broadest Printer Compatibility
- Supports all Functions of AIO Printers
- Bidirectional Status/Error Messages including Ink and Toner levels
- Supports any File Format for Storage
- Supports virtually any USB Peripheral
