DESCRIPTION

TECHNICAL DETAILS

DESCRIPTION

Store your project safe and sound in this nice weatherproof box with a clear top. We picked up this box because we like the machinable ABS plastic body and tough clear polycarbonate cover, ~~the stuff~~ ~~gasket seal, and the~~ easy-open screws that can be taken apart as

many times as you wish without worrying about cracking or stripping.

This box measures 80mm x 110mm x 45mm externally. You can fit a half-size Perma-Proto inside if you clip or sand down a corner a few mm, or an Arduino. It will not fit an Arduino Mega, Beaglebone, Menta or Minty Perma-proto.

TECHNICAL DETAILS

Download a diagram with dimensions!

- **Note:** The two (2) threaded inserts at the interior base of the enclosure are about 8mm high. If the base of your board/project does not rest between the threaded inserts, the adjusted height of the enclosure as a whole is 30mm.

Datasheet for DS-AT-0811-S

- Exact weight: 134.41g
- 80mm x 110mm x 45mm / 3.2" x 4.4" x 1.8" external size
- IP66 weatherproof rating
- The internal mounting bosses are M4 thread
