MGE EPS 6000 Features & Benefits

Manageability

Intuitive monitoring

Step by step navigation and menu screens for critical system information and data. Information is easy to access and presented in a very intuitive way.

Compatibility

Output synchronization to external source

UPS systems can be synchronized with any other independent source for use with downstream static transfer switches.

Parallel capability

Multiple units can be placed in parallel to meet power capacity and redundancy requirements

Availability

High availability architecture

Different running modes : hot stand-by, integrated parallel, or centralized static switch for multi-modules leading to availability architectures
