Product Overview

Documentation

(1) Year On-Site Warranty Extension for (1) Air Side Economizer Module with DX Features

Service Summary Report	Provides a detailed report of work performed including recommendations for service to ensure optimal performance
Flexible on site response times	Choose an on site response time that best meets your business requirements and budget
Flexible Service Scheduling	Flexible service scheduling options available to meet your business requirements
Onsite diagnostics & repair	While on site our Certified Field Service Engineers will diagnose, repair and test the unit to ensure optimal performance
Free shipment of replacement parts	Free shipment of any replacement parts needed, including free return shipment of faulty part.
Proactive monitoring	By utilizing customer-specific and global trending techniques, remote monitoring professionals can proactively identify and anticipate physical infrastructure threats before they occur.
7x24 Upgrade option	If you are like most businesses, you want your systems up and running during your busiest hours. In order to accommodate your busy schedule, APC offers an option to schedule services off hours. We will work with you to find a time when servicing your system is least likely to impact your productivity, saving your business time and money.
Experienced Certified Field Service Engineer	Our factory trained Field Service Engineers are rigorously trained and tested on how to efficiently service our products, as well as on safety practices and electrical codes, offering our customers the highest level of service available in the industry today.
Technical support	Our experienced technical support engineers are available to answer your questions, giving you peace of mind knowing the help you need is there when you need it.
Free firmware upgrades	Part of maintaining your system is ensuring the unit is operating with the most recent firmware version. Firmware upgrades are provided at no extra charge. All Preventive Maintenance contracts include free firmware upgrades.
Comprehensive escalation and corrective actions process	In order to resolve outages as quickly as possible and to keep such event from recurring, APC follows a rigorous escalation process that includes in depth root cause discovery and corrective actions practices.
Functional verification	During each Preventive Maintenance visit, our Certified Field Service Engineers will run tests to verify your system is functioning correctly in all operational modes, stopping problems before they start.
Consumables replacement	From air filters and fuses to fans and capacitors, APC will replace all parts on the system that expire as a result of normal wear and tear.

On Site Service Features & Benefits

Convenience
