# **Electrical Characteristics**

# Description

The Pxxx0FNL 3kA SIDACtor® Series in TO-262M package are bi-directional protection thyristor devices designed to be used in series with clamping device such as varistors or TVS diode for protecting AC power input lines.

This Series is ideal for use in outdoor LED lighting, CATV network, power supply and inverter applications.

# **Features and Benefits**

- 3kA 8/20 surge rating
- Automotive grade AEC-Q101 qualified
- AC mains protection between L -N
- Low overshoot voltage
- Low on-state voltage
- Surge capability does not degrade after multiple events within its surge ratings
- Fails short circuit if surged in excess of its surge rating

- Fast response in nanoseconds
- Pb-free E3 means 2<sup>nd</sup> level interconnect is Pb-free and the terminal finish material is tin(Sn) (IPC/JEDEC J-STD-609A.01)

HF Rohs 🔂 🕅 🕄

- RoHS-compliant and halogen-free
- Recognized to UL 497B as an Isolated Loop **Circuit Protector**

#### Notes:

- Absolute maximum ratings measured at T<sub>a</sub>= 25°C (unless otherwise noted). Components are bi-directional (unless otherwise noted).

### **Surge Ratings**

Notes:

1 Voltage waveform in µs 2 Current waveform in µs

- Peak pulse current rating (I<sub>pp</sub>) is repetitive and guaranteed for the life of the product.

#### **Thermal Considerations**
