Overview

NXP's NTAG I²C *plus* Explorer Kit is an all-in-one demonstration and development resource for NFC connected tags. Designed to emulate using an NTAG I²C *plus* tag chip in an embedded electronic system, the kit centers around a multi-purpose microprocessor-based development/demo board, and includes a full complement of hardware and software tools to support investigation of the NTAG I²C chip operation, the NFC RF communication link, and the I²C serial bus connected link; perform a variety of demonstrations; and develop/test your own applications.

Features

- NFC Explorer Board with PCB antenna board
- Additional components
- Applications
