| Wide Range of Applications                          | Configure-to-order process allows APC to configure, install, and test complete system before shipping                                                                                                                                                                                                                                                                           |                   |
| Remote Management Capabilities                      | Full-featured network management interfaces that provide standards-based management via Web, SNMP, and Telnet. Allows users to access, configure, and manage units from remote locations to save valuable time. Associated with this feature is the ability to quickly and easily upgrade the firmware via network download to installed units for future product enhancements. |                   |
| Local and web-based monitoring                      | Status available to customers both in the data center and remotely                                                                                                                                                                                                                                                                                                              |                   |
| Alarm Thresholds                                    | Current Transformers on each circuit that can provide amp ratings on each circuit position to prevent circuit breaker overloads                                                                                                                                                                                                                                                 |                   |
| Serviceability                                      |                                                                                                                                                                                                                                                                                                                                                                                 |                   |
| Front-access servicing                              | Simplifies installation and UPS maintenance while minimizing space requirements.                                                                                                                                                                                                                                                                                                |                   |
| Availability                                        |                                                                                                                                                                                                                                                                                                                                                                                 |                   |
