Primary-switched TRIO POWER power supply for DIN rail mounting, input: 3-phase, output: 24 V DC/10 A

Product Description

TRIO POWER power supplies with standard functionality

TRIO POWER is particularly suited to standard machine production, thanks to 1- and 3-phase versions up to 960 W. The wide-range input and the international approval package enable worldwide use.

The robust metal housing, the high electric strength, and the wide temperature range ensure a high level of power supply reliability.

Your advantages

- ☑ Use the third negative terminal block as a grounding terminal block and minimize installation costs
- Maximum operational reliability thanks to high MTBF (mean time between failures) of more than 500,000 hours and high dielectric strength of up to 300 V AC
- ☑ Rugged design with metal housing and wide temperature range from -25 to +70°C
- ☑ Compensation of voltage drops by means of output voltage that can be adjusted on the front.
