**TECHNICAL DETAILS**

# DESCRIPTION

NooBs is the fastest way to have a variety of operating systems on your Pi. Available on an 8G microSD card, you can now boot multiple OS's such as Raspbian, Kodi, OSMC, Windows 10 IoT, etc. There's a boot up menu for selecting which one you like. **This card has PIXEL on it with Raspbian all ready to go with no network connection.** It has enough space for 2 or 3 simultaneous OS options!

Plug in Ethernet cable to also download the latest versions of LibreELEC (Kodi)

**Works with any and all Raspberry Pi computers released before Feb 28, 2018. Does not work with the Raspberry Pi 3 Model B+ which was released a few weeks later.** If you're using the 3B+, this will not boot, you'll need to re-burn the image completely.

**Note:** As of February 28th 2018, this product is now programmed with **PIXEL desktop NOOBS**

and will boot directly to desktop. This item no longer comes with a microSD-to-SD adapter card

as all modern Raspberry Pi's use only MicroSD
