

! Discontinued - Service only

Commercial status

Discontinued on: 22 June 2020

End-of-service on: 01 September 2021

AP9161200 has not been replaced. Please contact your customer care center for more information.

Overview

Presentation	IT Power Control, powered by Intel® DCM, delivers rack-level power capping for an optimized infrastructure and delayed physical equipment investment. Increased rack densities are achieved through power capping of servers and racks, reducing over-provisioning and enabling operation of the data center closer to the capacity limit without compromising availability and safety margins. Redistribution of power density according to criticality levels are easily implemented through the use of rack based policy configurations, ensuring power savings and delayed physical equipment investments. The software requires Data Center Operation: IT Optimize.
Lead time	Usually in Stock

Packing Units

Package 1 Weight	0.45 kg
Package 1 Height	22.9 cm
Package 1 width	17.8 cm
Package 1 Length	0.6 cm
