## 34 V Constant-Current LED Driver Controller Evaluation Board

---

No. EEV-365-001A-0020-220511

R1580N001A-0020-EV is the evaluation board for R1580 which has the below features, benefits and specifications.

### OUTLINE

The R1580N is a 34-V constant-current LED driver controller. Internally, this device consists of a linear dimming controller using a PWM input signal, a thermal shutdown circuit (TSD), and an undervoltage lockout circuit (UVLO) in addition to the basic constant-current control circuits. A flicker-free wide-dimming constant-current LED driver can be configured by only adding an Nch MOSFET, a current sensing resistor and capacitors to the R1580N. The FET to control current flow is placed externally, so that the R1580N will not give any influence on the current range capable of dealing with. The R1580N is linear dimmable with using a PWM signal on the DIM pin. The R1580N is capable of performing a constant-current control corresponding to the different PWM duty cycles. The R1580N001A is linear dimmable as low as 1% PWM duty cycle. Unlike other LED drivers with PWM dimming, the R1580N can provide a smooth flicker-free dimming operation using linear dimming. The R1580N is offered in a small 6-pin SOT-23-6 package.

### FEATURES

#### **R1580N001A**

- Input Voltage Range (Max. Rating): 3.6 V to 34.0 V (36.0 V)
- Operating Temperature Range: -40°C to 85°C
- Line Regulation: Typ. 0.01%/V
- Thermal Shutdown Protection
- Linear Dimmable Using a PWM Signal
- LED current set value: 20 mA
- Package: SOT-23-6
- For more details on R1580 IC, please refer to <https://www.nisshinbo-microdevices.co.jp/en/pdf/datasheet/r1580-ea.pdf>

#### **R1580N001A (Comparator Input, 1.0% PWM Duty)**

- Max. SOURCE Pin Voltage Accuracy (100% PWM Duty): Typ. 400 mV ±8 mV
- Min. SOURCE Pin Voltage Accuracy (1.0% PWM Duty): Typ. 4 mV ±2 mV
- Supply Current: Typ. 320 µA, Standby Current: Typ. 140 µA

## PCB LAYOUT

## ABSOLUTE MAXIMUM RATINGS

### Absolute Maximum Ratings

Symbol	Parameter			Rating	Unit
$V_{IN}$	VIN Pin Voltage			-0.3 to 36	V
$V_{DIM}$	DIM Pin Voltage			-0.3 to $V_{IN} + 0.3$	V
$V_{ISET}$	ISET Pin Voltage			-0.3 to $V_{IN} + 0.3$	V
$V_{SOURCE}$	SOURCE Pin Voltage			-0.3 to 6.5	V
$V_{GATE}$	GATE Pin Voltage			-0.3 to $V_{IN} + 0.3$	V
$I_{DIM}$	DIM Pin Current			20	mA
$P_D$	Power Dissipation <sup>(1)</sup>	SOT-23-6	JEDEC STD.51-7	660	mW
$T_j$	Junction Temperature Range			-40 to 125	°C
$T_{stg}$	Storage Temperature Range			-55 to 125	°C

### ABSOLUTE MAXIMUM RATINGS

Electronic and mechanical stress momentarily exceeded absolute maximum ratings may cause the permanent damages and may degrade the life time and safety for both device and system using the device in the field. The functional operation at or over these absolute maximum ratings are not assured.

## RECOMMENDED OPERATING CONDITIONS

### Recommended Operating Conditions

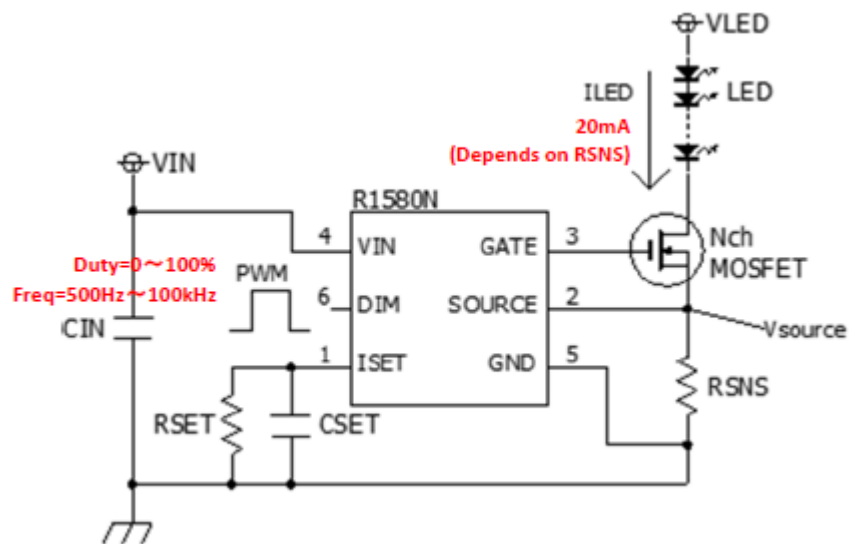

Symbol	Parameter	Rating	Unit
$V_{IN}$	Operating Input Voltage	3.6 to 34	V
$T_a$	Operating Temperature Range	-40 to 85	°C

### RECOMMENDED OPERATING CONDITIONS

All of electronic equipment should be designed that the mounted semiconductor devices operate within the recommended operating conditions. The semiconductor devices cannot operate normally over the recommended operating conditions, even if when they are used over such conditions by momentary electronic noise or surge. And the semiconductor devices may receive serious damage when they continue to operate over the recommended operating conditions.

<sup>(1)</sup> Refer to *POWER DISSIPATION* for detailed information.

## TYPICAL APPLICATION

R1580N001A-0020-EV Typical Application Circuit

Recommended Components<sup>(1)</sup>

Symbol	Value
CIN	0.1 $\mu$ F
CSET	0.22 $\mu$ F
FET	
RSNS	20 $\Omega$
RSET	OPEN

<sup>(1)</sup>The bill of materials will be attached on the shipment of each purchased evaluation board.

## PIN DESCRIPTIONS

**SOT-23-6 Pin Configuration**

### SOT-23-6 Pin Description

Pin No.	Pin Name	Description
1	ISET	Current Setting Pin
2	SOURCE	Nch MOSFET Source Input Pin
3	GATE	Nch MOSFET Gate Output Pin
4	VIN	Power Supply Pin
5	GND	Ground Pin
6	DIM	PWM Signal Input Pin

1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to our sales representatives for the latest information thereon.
2. The materials in this document may not be copied or otherwise reproduced in whole or in part without prior written consent of our company.
3. Please be sure to take any necessary formalities under relevant laws or regulations before exporting or otherwise taking out of your country the products or the technical information described herein.
4. The technical information described in this document shows typical characteristics of and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under our company's or any third party's intellectual property rights or any other rights.
5. The products listed in this document are intended and designed for use as general electronic components in standard applications (office equipment, telecommunication equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death (aircraft, spacevehicle, nuclear reactor control system, traffic control system, automotive and transportation equipment, combustion equipment, safety devices, life support system etc.) should first contact us.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, fire containment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. Anti-radiation design is not implemented in the products described in this document.
8. The X-ray exposure can influence functions and characteristics of the products. Confirm the product functions and characteristics in the evaluation stage.
9. WLCSP products should be used in light shielded environments. The light exposure can influence functions and characteristics of the products under operation or storage.
10. There can be variation in the marking when different AOI (Automated Optical Inspection) equipment is used. In the case of recognizing the marking characteristic with AOI, please contact our sales or our distributor before attempting to use AOI.
11. Please contact our sales representatives should you have any questions or comments concerning the products or the technical information.
