Introduction

ITT Industries, Cannon connectors series CA-COM and CA-COM-B are derivations of connectors according to MIL-C-5015 or VG95234. They were developed especially for industrial applications. Connectors of both CA-COM series are interchangeable with the corresponding types as per MIL-C-5015 and VG95234, as they offer the same mounting dimensions and contact arrangements.

The CA-COM and CA-COM-B connector series offer

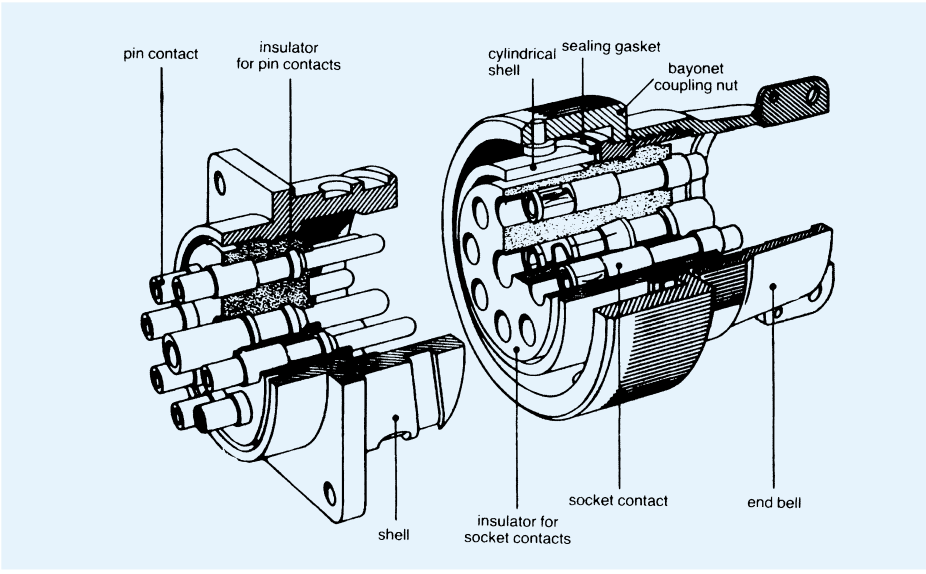

- Wall mounting receptacles
- Cable connecting plugs
- Box mounting receptacles
- Straight plugs
- Plugs 90°

Wall mounting receptacles and cable connecting plugs (straight and 90°) are available with

- Endbell with cable clamp
- Endbell for flex tubes
- Adapter combined for PG terminations acc. to DIN 46320
- Adapter for heat shrink boots

Furthermore Cannon also provides the appropriate accessories like

- Protective metal caps
- Sash chains
- Cable clamps
- Cable bushings
- Sealing gaskets

CA-COM

- Threaded coupling
- Mateable with all connectors according to MIL-C-5015 and series CA respectively
- Either solder or crimp contacts
- Contact arrangements with 1 to 37 contacts
- Wire sizes from 0,14 up to 2,5 mm²
- Shells made of aluminum alloy enable to withstand high mechanical strain*
- Surface protected by nickel plating
- Resilient insulator (polychloroprene) for wide temperature range (–55/125°C)
- Resistant against aggressive fluids like fuel, oil, etc.
- Environmental by means of an adapter for PG termination, universal endbell and heat shrink boots
- Min 500 mating cycles
- Spray-waterproof IP67

CA-COM-B

- Bayonet coupling
- Mateable with all connectors according to VG95234 and series CA-B respectively
- Either solder or crimp contacts
- Contact arrangements with 1 to 37 contacts
- Wire sizes from 0,14 to 2,5 mm²
- Shells made of aluminum alloy enable to withstand high mechanical strain*
- Surface protected by nickel plating
- Resilient insulator (polychloroprene) for wide temperature range (–55/125°C)
- Resistant against aggressive fluids like fuel, oil, etc.
- Environmental by means of an adapter for PG termination, universal endbell and heat shrink boots
- Min 500 mating cycles
- Waterproof (1 bar, 12 hours)

Electrical data

Rated current
20°C ambient temperature

Contact size AWG / metric	Rated current A max[1])
15S	22
15	22
25	41
100	74

[1]) This applies only to the max. rated current for one contact. If several contacts in one contact arrangement are loaded with higher current the specific heat and the ambient temperature may not exceed +125°C.

Rated current vs. ambient temperature

Contact resistance (Millivolt test)

Contact size metric	Contact resistance mΩ max
15S	6
15	6
25	3
100	1

Insulation resistance > 1000 MΩ

Air and creepage paths mm (min)

Voltage class	Instr.	A	D
Air path mm	0,7	1,1	2,8
Creepage path mm	0,7	1,1	2,8

Operating Voltage and connector usage

When the connectors in this catalogue are used for voltages greater than 50 Volts and have touchable conductive shell parts they must be used in accordance with the safety regulations DIN VDE Part 410; IEC 60364-4-41. This regulation basically dictates that the power source should be turned off before any mating and unmating of the connector, this regulation does not provide for protection against electrical shock when mating and unmating the connectors in the live condition.

Mechanical data

Max operating temperature
acc. to DIN IEC 68, part 1 –55/125°C

Mating cycles min 500

Min separating force per contact

Contact size metric	Separating force N
15S	1,0
15	1,0
25	1,5
100	3,0

Contact retention
Test force to be applied in mating direction

Contact size metric	Test force N
15S	35
15	35
25	55
100	80

Coupling torque
The allowable coupling torque has to be tested under harnessed conditions

Shell size	Allowable coupling torque Closing and opening (N max) CA-COM	CA-COM-B	Opening (N min) CA-COM, CA-COM-B
10SL	3,0	2,6	0,15
12S	2,8	2,8	0,23
14S	5,9	3,0	0,35
16S/16	7,0	3,5	0,46
18	8,0	4,0	0,58
20	9,0	4,5	0,7
22	10,6	5,0	0,8
24	12,9	6,0	0,8
28	16,7	7,0	0,92
32	18,1	8,5	1,02
36	23,9	10,0	1,05

Materials

Shell	Aluminum alloy, Zinc dicast nickel plated
Contacts	Copper alloy, silver plated
Insulator	Polychloroprene

How to order

CA 06 COM-E 18-1 P W xx
CA 06 COM-E 18-1 P W - B - xx

Series
CA - Cannon designation

Shell style
00 - Wall mount receptacle
01 - Cable connecting plug
02 - Box mount receptacle
20 - Box mount receptacle for rear wall mounting (Bayonett coupling only)
06 - Plug, straight
08 - Plug 90°

Class
COM-E - Endbell with cable clamp [1])
COM-F - Endbell for flex tube
COM-PG - Adapter for PG termination, environmental
COM-L - PCB Solder termination
COM-IN - universal endbell

Shell size
10SL, 12S, 14S, 16, 16S, 18,
20, 22, 24, 28, 32*, 36* (* = upon request)

Contact arrangement
see pages 6 – 8

Contact type
P - Pin contact
S - Socket contact

Alternate insert position
Insert insulator position – see page 9

Coupling
B - Bayonet coupling
- without designation: threaded coupling

Modification
01 - metric crimp contacts
03 - Adapter for heat shrink boots and metric crimp contacts (only for bayonet coupling by shell style 01 + 06 class -E)
06 - Adapter for heat shrink boots and solder contacts (only for bayonet coupling by shell style 01 + 06 class -E)
44 - with end ring and grommet (for class E and F only)
48 - F-Endbell with O-ring
DN - Adapter for heat shrink boots and solder contacts (Mod. for threaded coupling)
F0 - without contacts (to be ordered separately)

[1]) except shell style 02 / 20

Downloaded from Arrow.com.

Contact arrangements

On pages 6 – 8 the contact arrangements are shown by shell sizes. The table below gives an overview on the number of contacts, recommended contact and wire sizes and the service rating class. Other contact arrangements acc. to MIL-C-5015 and VG 95234 upon request.

Shell size	Contact arrangement	Number of contacts	Contact size metric	Wire size mm²	Service rating nach IEC
10SL	10SL-3	3	15S	0,75 – 1,5	A
	10SL-4	2	15S	0,75 – 1,5	A
12S	12SA10	4	15S	0,75 – 1,5	A
14S	14S-2	4	15S	0,75 – 1,5	Inst.
	14S-5	5	15S	0,75 – 1,5	Inst.
	14S-6	6	15S	0,75 – 1,5	Inst.
	14SA7	7	15S	0,75 – 1,5	Inst.
16	16-10	3	25	2,0 – 3,0	A
16S	16S-1	7	15S	0,75 – 1,5	A
18	18-1	10	15	0,75 – 1,5	A (B, C, F, G) Inst. (all others)
	18-8	7 + 1	15 + 25	1 – 1,5 + 2,5	A
	18-10	4	25	2,0 – 3,0	A
	18-11	5	25	2,0 – 3,0	A
	18-12	6	15	0,75 – 1,5	A
20	20-15	7	25	2,0 – 3,0	A
	20-17	1	15	0,75 – 1,5	A
		5	25	2,0 – 3,0	A
	20-19	3	100	10	A
	20-27	14	15	0,75 – 1,5	A
	20-29	17	15	0,75 – 1,5	A
22	22-14	19	15	0,75 – 1,5	A
	22-19	14	15	0,75 – 1,5	A
	22-23	8	25	2,0 – 3,0	D (H)
24	24-28	24	15	0,75 – 1,5	Inst.
28	28-15	35	15	0,75 – 1,5	A

Additional contact arrangements (per MIL-C-5015 and VG95234) upon request.

Wire selection

Contact size Metric	Wire sizes for crimp and solder contacts Metric mm²	Conductor ∅ mm²
15S	0,75 – 1,5	1,6 – 3,3
15	0,75 – 1,5	1,6 – 3,3
25	2,0 – 3,0	2,9 – 4,3
100	10,0	4,2 – 6,5

Stripping lengths of wires

Strip wires carefully. Do not damage conductors and insulation.

For solder connections, wires have to be pretinned. Do not twist conductors used in crimp contacts, otherwise no perfect crimp connection will be achieved. Do not touch conductors before crimping. Film of grease or lubricants on the strands will cause poor crimp quality.

Stripping length for contacts sizes 15S, 15 and 25 is 6,2 mm.

Telescoping bushing

The telescoping bushing is used together with above cable clamps CA121051-... It keeps oil, dirt or dust out of the endbell. Wrapping or insulating of the wires fed through the clamp is eliminated since they are protected by the bushing. Combinations of bushings may be used to reduce cable entry diameters for improved sealing.

Gaskets

These sealing gaskets made of neoprene are used with receptacles with flange for sealing between the shell and the flange of the receptacle.

for CA00COM-B

for CA02COM/CA02COM-B/CA00COM

Crimp contacts

Connectors of series CA-COM and CA-COM-B are also available with crimp contacts for AWG wire sizes. In order to wire, insert and extract these contacts the tools mentioned on this page are needed. All tools have to be ordered separately.

Please ask for our detailed Wiring and Assembly instructions.

Downloaded from Arrow.com.

Hand crimp tool

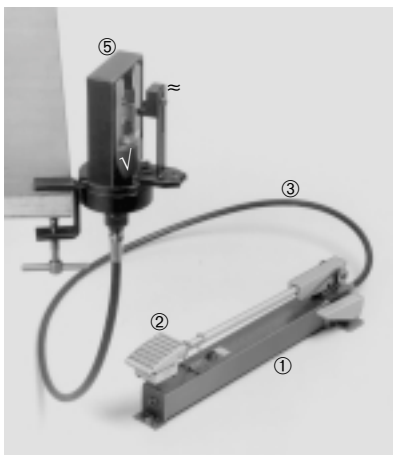

Dimensions (closed, without locator)
220 x 60 x 22 mm
Weight (without turret) approx. 800 g

Pneumatic crimp tool

Pneumatic table crimp tool WA 27F-CE

Hydraulic hand crimp tool

1 Hand pump
2 Foot pedal
3 High pressure hose 2 m
4 Crimp head
5 Safety device incl. bench mounting
6 Positioner
(to be used with 121086-3079 only)

Technical Data

Hand pump:	
Length	560 mm
Width	140 mm
Hight	120 mm
Oil contents	900 cm^3
Usable oil quality	730 cm^3
Output per lift	2,5 cm^3
High pressure hose:	
Length	2 m
Crimp head:	
Crimp force	120 kN
Lift (with positioners)	25 mm
Weight (incl. oil)	13 kg approx.

Insertion tools / Extraction tools

Insertion tool

Insertion pliers

Extraction tool

Product Safety Information

THIS NOTE SHOULD BE READ IN CONJUNCTION WITH THE PRODUCT DATA SHEET/CATALOGUE. FAILURE TO OBSERVE THE ADVICE IN THIS INFORMATION SHEET AND THE OPERATING CONDITIONS SPECIFIED IN THE PRODUCT DATA SHEET/CATALOGUE COULD RESULT IN HAZARDOUS SITUATIONS.

1. MATERIAL CONTENT AND PHYSICAL FORM
   Electrical connectors do not usually contain hazardous materials. They contain conducting and non-conducting materials and can be divided into two groups.

   a) Printed circuit types and low cost audio types which employ all plastic insulators and casings.

   b) Rugged, Fire Barrier and High Reliability types with metal casings and either natural rubber, synthetic rubber, plastic or glass insulating materials.

   Contact materials vary with type of connector and also application and are usually manufactured from either copper, copper alloys, nickel, alumel, chromel or steel. In special applications, other alloys may be specified.

2. FIRE CHARACTERISTICS AND ELECTRIC SHOCK HAZARD
   There is no fire hazard when the connector is correctly wired and used within the specified parameters. Incorrect wiring or assembly of the connector or careless use of metal tools or conductive fluids, or transit damage to any of the component parts may cause electric shock or burns. Live circuits must not be broken by separating mated connectors as this may cause arcing, ionisation and burning.
   Heat dissipation is greater at maximum resistance in a circuit. Hot spots may occur when resistance is raised locally by damage, e.g. cracked or deformed contacts, broken strands of wire. Local overheating may also result from the use of the incorrect application tools or from poor quality soldering or slack screw terminals. Overheating may occur if the ratings in the Product Data Sheet/Catalogue are exceeded and can cause breakdown of insulation and hence electric shock.
   If heating is allowed to continue it intensifies by further increasing the local resistance through loss of temper of spring contacts, formation of oxide film on contacts and wires, and leakage currents through carbonisation of insulation and tracking paths. Fire can then result in the presence of combustible materials and this may release noxious fumes. Overheating may not be visually apparent. Burns may result from touching overheated components.

3. HANDLING
   Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers.
   Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found to be damaged.

4. DISPOSAL
   Incineration of certain materials may release noxious or even toxic fumes.

5. APPLICATION
   Connectors with exposed contacts should not be selected for use on the current supply side of an electrical circuit, because an electric shock could result from touching exposed contacts on an unmated connector. Voltages in excess of 30 V ac or 42.5 V dc are potentially hazardous and care should be taken to ensure that such voltages can not be transmitted in any way to exposed metal parts of the connector body. The connector and wiring should be checked, before making live, to have no damage to metal parts or insulators, no solder blobs, loose strands, conducting lubricants, swarf, or any other undesired conducting particles. Insulation resistance should be checked to make certain that no low resistance joints or spurious conducting path are existing between contacts and exposed metal parts of the connector body. Further the contact resistance of the connectors should be measured within the electrical circuit in order to identify high resistances which result in excessive connector heating.

Always use the correct application tools as specified in the Data Sheet/Catalogue.

Do not permit untrained personnel to wire, assemble or tramper with connectors.

For operation voltage please see appropriate national regulations.

IMPORTANT GENERAL INFORMATION.

1. Air and creepage paths/Operating voltage
   The admissible operating voltages depend on the individual applications and the valid national and other applicable safety regulations.

   For this reason the air and creepage path data are only reference values. Observe reduction of air and creepage paths due to PC board and/or harnessing.

2. Temperature
   All information given are temperature limits. The operation temperature depends on the individual application.

3. Other important information
   Cannon continuously endeavours to improve their products. Therefore, Cannon products may deviate from the description, technical data and shape as shown in this catalogue and data sheets.

4. Harnessing and Assembly Instructions
   If applicable, our special harnessing and/or assembly instruction has to be adhered to. This is provided at request.

ITT Cannon, a division of ITT Industries, Inc. manufactures the highest quality products available in the marketplace; however these products are intended to be used in accordance with the specifications in this catalog. Any use or application that deviates from stated operating specifications is not recommended and may be unsafe. No information and data contained in this catalog shall be construed to create any liability on the part of Cannon. Any new issue of this catalog shall automatically invalidate and supersede any and all previous issues. **A limited warranty applies to Cannon products. Except for obligations assumed by Cannon under this warranty, Cannon shall not be liable for any loss, damage, cost of repairs, incidental or consequential damages of any kind, whether or not based on express or implied warranty, contract, negligence or strict liability arising in connection with the design, manufacture, sale, use or repair of the products.** Product availability, prices and delivery dates are exclusively subject to our respective order confirmation form; the same applies to orders based on development samples delivered. This catalog is not to be construed as an offer. It is intended merely as an invitation to make an offer. By this publication, Cannon does not assume responsibility or any liability for any patent infringements or other rights of third parties which may result from its use. Reprinting this catalog is generally permitted, indicating the source. However, Cannon's prior consent must be obtained in all cases.
