PCB terminal block, 2060 Series, Push-in CAGE CLAMP®

Our PCB terminal block (item number 2060-852/998-404) is designed for seamless electrical installations. It offers the flexibility needed for different mounting types. Rated current and voltage are important parameters when selecting a PCB terminal block, as they indicate possible applications and uses. This product has a rated voltage of 630 V and a rated current of 9 A. Strip lengths must be between 7 mm and 9 mm when connecting conductors to this PCB terminal block. Featuring one conductor terminal along with Push-in CAGE CLAMP®, this product outperforms the competition. Our Push-in CAGE CLAMP® is a universal, maintenance-free connection solution for all conductor types, boasting a key feature: It allows direct insertion of both solid and fine-stranded conductors with ferrules without needing tools. No preparation is required; for example, crimping the conductor's ferrule is not necessary. Dimensions: 11.9 x 4.5 x 13.1 mm (width x height x depth). Depending on the conductor type, this PCB terminal block is designed for conductor cross sections ranging from 0.2 mm² to 0.75 mm². Up to two potentials / two poles can be connected to this terminal strip using two clamping points on one level. The contacts are made of copper alloy, the clamping spring is made of a Copper alloy, and the white housing is made of polyphthalamide (PPA GF) for insulation. Tin is used for coating the contact surfaces. This PCB terminal block is operated with a push-button. The PCB terminal block is designed for SMD soldering. The conductor is designed to be inserted at an angle of 0°.

Notes

Note

Application notes:

Suitable for lead-free, reflow-soldering profiles per DIN EN 61760-1 and IEC 60068-2-58 up to max. 260°C peak temperature. Due to application-specific variables (component configuration and orientation, type of soldering machine, solder paste), trial runs are recommended to ensure product and process compatibility under actual manufacturing conditions.

Depending on reflow soldering temperatures and times, color deviations may occur. These deviations will have no impact on functionality.

Recommendation

Recommendation for stencil:

150 µm material thickness; Pattern layout identical to solder pad layout
