

TAOGLAS®

Datasheet

Part No:
ADFGP.50A.07.0100C

Description

Embedded Active GNSS Dual Stacked Patch Antenna
with 100mm of 1.37 & IPEX MHFI

Features:

Embedded Dual Patch, Dual Feed 4-Pin Assembly

Covering Bands:

- GPS/QZSS (L1/L2)
- GPS/QZSS/IRNSS (L5)
- Galileo (E1/E5a/E5b)
- GLONASS (G1/G2/G3)
- BeiDou (B1/B2a/B2b)

Low Axial Ratio

Cable: 100mm of 1.37mm

Connector: IPEX MHFI (U.FL)

Dimensions: 50 x 50 x 16.8mm

RoHS & Reach Compliant

1. Introduction

The ADFGP.50A, with Taoglas Sure Technology, is a precision-engineered active dual patch, dual-feed antenna for GPS (L1/L2/L5), GLONASS (G1/G2/G5), Galileo (E1/E5a/E5b) and BeiDou (B1/B2). The antenna comes mounted on a 50*50 mm PCB (ground plane). It consists of two stacked patches, 50mm, and 40mm in width and is 16.8mm thick. It has been tuned and tested on a 50*50mm ground plane specifically for GPS L1: 1575.42MHz, L2: 1227.6MHz and L5: 1176.45MHz as well as the GLONASS, Galileo, BeiDou and IRNSS bands shown in Section 2.

Each patch element uses two orthogonal feeds that are combined in a hybrid coupler to ensure optimal axial ratio. The antenna exhibits excellent gain and good radiation pattern stability leading to a reliable GNSS fix in areas of weaker signal strength. All these elements combined ensure the best possible positional accuracy for your device.

Both patch elements have a dual pin feed to ensure a low axial ratio and should be used in conjunction with a hybrid coupler. The ADFGP.50A includes LNAs and front-end SAW filters to reduce out of band noise, such as from nearby cellular transceivers. It offers better protection from nearby radiated power surges and greatly reduces the probability of damaging your GNSS receiver from nearby transmissions.

Features:

- Multi-GNSS, high-performance antenna
- Excellent signal to noise ratio (C/N0)
- Good 2DRMS and fast TTFF
- Axial ratio < 2dB typ. across all bands
- Phase stability provides excellent Phase Center Variation (PCV)

Benefits:

- Excellent positional accuracy
- Great for use in difficult environments
- Multiband improves the receiver's position estimation in terms of accuracy and reliability
- Ideal antenna solution for multiband RTK systems.

The ADFGP.50A is connected via an IPEX MHFI connector and works well without modifications in most environments, however, it can be tuned and optimized for different ground planes and enclosures if required. It is manufactured and tested in a TS16949 first tier automotive approved facility.

Typical applications include:

- High accuracy positioning and navigation systems
- UAVs, Robotics & Autonomous Vehicles
- Micro-Mobility Solutions
- Mapping & GIS
- Transportation & Telematics
- Precision Agriculture
- Public Safety, Search & Rescue
- RTK Systems

Custom antenna modifications are subject to possible NRE and minimum order quantity. For further information or support to test and integrate Taoglas Sure technology please contact your regional Taoglas customer support team. We recommend installing this antenna with an adhesive foam backing as shown in section 9, to configure this product with adhesive foam please contact your regional Taoglas customer support team.

Polarization	RHCP						
Impedance	50 Ω						
Note: The antenna with Hybrid coupler was tested on a 70x70 mm ground plane							

Mechanical	
Dimensions	50 x 50 x 16.8mm
Connector	IPEX MHFI (U.FL)
Cable	Coaxial Cable ø1.37: Length 100mm
Weight	95.5g

Environmental	
Operation Temperature	-40°C to 85°C
Storage Temperature	-40°C to 85°C
Humidity	Non-condensing 65°C 95% RH

3. Mechanical Drawing

- NOTES:
1. Shielding case area
 2. Soldered Area.
 3. Soldermask Area.
 4. All material must be RoHS compliant
 5. The connector orientation is definition as per drawing:
If the cable length is $< 100\text{mm}$, the connector orientation should be same as per drawing.
If the cable length is $\geq 100\text{mm}$, the connector orientation in the drawing only for reference.
 6. *Refer to the application note APN-12-8-002.B. The antenna is physically tuned a number of ways, the shape of the top silver electrode can be changed, or the feed-point can be moved(excluding feed pin)."

	Name	Material	Finish	QTY
1	Patch 40x40x1mmx50x50x0.3mm	Ceramics	Clear	1
2	1.37 Coaxial Cable	FEP	Gray	1
3	IPEX MHFHT	Brass	Au Plated	1
4	PCB	Composite 0.8	Green	1
5	Shielding Case	SPTE	Sn Plated	1

4. Installation Suggestion

We do not supply our standard ADFGP.50A with adhesive backing however this can be requested via your regional Taoglas customer support team. The below details the optimum way to install the ADFGP.50A Antenna for use in conjunction with adhesive backing.

Item Number	Description	Material
1	Adhesive Mounting Pad for ADFGP.50A	Acrylic Foam
2	Small Adhesive Mounting Pad for ADFGP.50A	Acrylic Foam
3	Shielding Case	SPTE
4	1.37 Coaxial Cable	FEP
5	PCB	Composite 0.8+
6	Stacked Patch 40x40x4 mm & 50x50x8 mm	Ceramic

5. Packaging

8pcs ADFGP.50A.07.0100C per PE Bag
Weight: 800g

24pcs ADFGP.50A.07.0100C per carton
Dimensions: 256 x 154 x 96mm
Weight: 2600g

96pcs ADFGP.50A.07.0100C per large carton
Dimensions: 327 x 280 x 218mm
Weight: 11Kg

6. Antenna Characteristics (with hybrid coupler)

8. Field Test Results

In this section Taoglas will present the field test result for ADFGP.50 antenna. The test was performed when the antenna was mounted on a static rooftop test set up in an open sky environment for at least 6 hours.

Taoglas will show the field test results using the following receiver:

8.1 U-blox ZED-F9P

Receiver features:

- Multi-band GNSS: 184-channel GPS L1C/A L2C, GLONASS: L1OF L2OF, Galileo: E1B/C E5b, BeiDou: B1I B2I, QZSS: L1C/A L2C
- Multi-band RTK with fast convergence times and reliable performance
- Nav. update rate RTK up to 20 Hz
- Position accuracy = RTK 0.01 m + 1 ppm CEP

Positioning Accuracy Table (2D Accuracy)					
Test Condition	Correction Service	CEP (50%)	DRMS (68%)	2DRMS (95-98.2%)	TTFF (sec)
Free Space	RTK DISABLED	56.42 cm	73.23 cm	146.46 cm	15
	RTK ENABLED	0.9 cm	1.08 cm	2.16 cm	15
30x30 cm Ground Plane	RTK DISABLED	46.69 cm	58.83 cm	117.65 cm	12
	RTK ENABLED	0.8 cm	0.96 cm	1.93 cm	12
