

Datasheet

Single line ESD protection for high speed lines in 0402

SOD882T(0402) (QFN-2L 1.0 x 0.6 x 0.35)

Product status link

ESDAXLC6-1BT2

Features

- Flow-through routing to keep signal integrity
- Ultra large bandwidth: 12 GHz
- Ultra low capacitance: 0.4 pF
- Extended operating junction temperature range: -55 °C to 150 °C
- RoHS compliant
- Complies with IEC 61000-4-2 C = 150 pF, R = 330 Ω
 - ±16 kV (contact discharge)
 - ±30 kV (air discharge)

Application

The ESDAXLC6-1BT2 is a bidirectional single line TVS diode designed to protect the data line or other I/O ports against ESD transients such as:

- Digital video interface
- Ethernet
- USB 2.0 and USB 3.0
- · High speed communication buses
- RF front-end

Description

The ESDAXLC6-1BT2 is an ESD device designed for high-speed lines protection.

For automotive application, an AEC-Q101 qualified version is available see ESDAXLC6-1BT2Y.

1 Characteristics

Table 1. Absolute maximum ratings (T_{amb} = 25 °C)

Symbol		Value	Unit	
		IEC 61000-4-2 (C = 150 pF, R = 330 Ω):		
V_{PP}	Peak pulse voltage	Contact discharge	16	kV
		Air discharge	30	
P _{PP}	Peak pulse power dissipation (8/20 µs)		40	W
I _{PP}	Peak Pulse current (8/20 µs)		1.3	Α
T _{stg}	Storage temperature range			°C
Tj	Operating junction temperature range			°C
TL	Maximum lead temperature for soldering during 10 s			°C

Figure 1. Electrical characteristics (definitions)

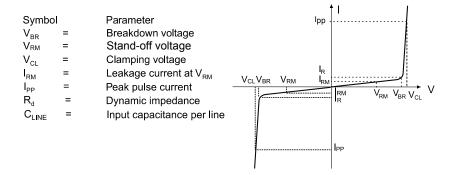

Table 2. Electrical characteristics (values) (T_{amb} = 25° C)

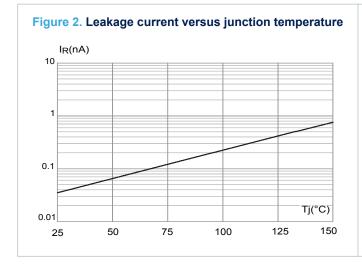

Symbol	Test conditions	Min.	Тур.	Max.	Unit	
V _{BR}	I _R = 1 mA	6	9	11	V	
I _R	V _R = 3 V			50	nA	
	I _{PP} = 1 A, 8/20 μs			17		
V _{CL}	IEC 61000-4-2 - C = 150 pF, R = 330 Ω +8 kV contact discharge, measured at 30 ns		37		V	
	TLP, pulse duration 100 ns, 16 A		41			
R _d	TLP, pulse duration 100 ns, 16 A		2		Ω	
C _{I/O-GND}	V _{I/O} = 0 V, 200 MHz < f < 3 GHz, V _{OSC} = 30 mV		0.4	0.5	pF	
f _C	$S_{21} = -3 \text{ dB}$		12		GHz

Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK packages, depending on their level of environmental compliance. ECOPACK specifications, grade definitions and product status are available at: www.st.com. ECOPACK is an ST trademark.

2.1 Package information

3 Assembly recommendations

3.1 Recommended footprint

Figure 22. Recommended footprint in mm

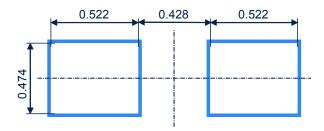

Note: Solder mask defined (SMD) recommended.

3.2 Stencil opening design

Stencil opening thickness: 75 µm / 3 mils

Figure 23. Stencil opening recommendations

3.3 Solder paste

- 1. Halide-free flux, qualification ROL0 according to ANSI/J-STD-004.
- 2. "No clean" solder paste recommended.
- 3. Tack force high enough to resist component displacement during PCB movement.
- 4. Particles size 20-38 μm per IPCJ STD-005.

DS9261 - Rev 3 page 8/12

3.4 Placement

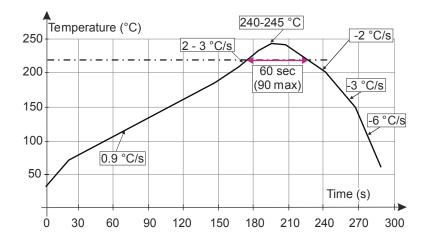

- 1. It is recommended to use leads recognition instead of package outline for accurate placement on footprint with adequate resolution tool.
- 2. Tolerance of ±50 µm (25% offset allowed on the smallest dimension of the smallest pad) is recommended.
- 3. 1.0 N placement force is recommended. Too much placement force can lead to squeezed out solder paste and cause solder joints to short. Too low placement force can lead to insufficient contact between package and solder paste that could cause open solder joints or badly centered packages.
- 4. For assembly, a perfect supporting of the PCB (all the more on flexible PCB) is recommended during solder paste printing, pick and place and reflow soldering by using optimized tools.

3.5 PCB design preference

- 1. Any via around or inside the footprint area must be closed to avoid solderpaste migration in the via.
- Position and dimensions of the tracks should be well balanced. A symmetrical layout is recommended to prevent assembly troubles.

3.6 Reflow profile

Figure 24. ST ECOPACK recommended soldering reflow profile for PCB mounting

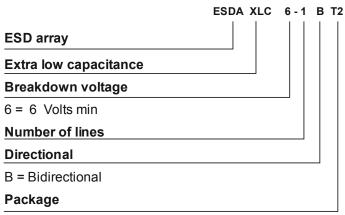

Note: Minimize air convection currents in the reflow oven to avoid component movement. O₂ rate inside the oven must be below 500 ppm. Maximum soldering profile corresponds to the latest IPC/JEDEC J-STD-020.
